

AutoCAD-Based Design To Manufacturing Software

Microvellum provides a powerful customisable CAD/CAM/CIM software platform to help wood product manufacturers streamline their design, drafting, estimating, engineering, and manufacturing processes.

DESIGN & DRAFTING

Industry standard CAD toolsets to help you design with automation.

ESTIMATES & PLANNING

Predict your time, material & labour costs with confidence.

CUSTOM ENGINEERING

Flexible engineering tools enabling intelligent product design.

CUSTOM ENGINEERING

Streamline your production using a single software solution for manufacturing.

Highly Customisable And Extensive Product Libraries

Our growing product libraries come equipped with a massive variety of customisation. Endless variable possibilities allow you to use the built-in logic to configure cabinet construction to meet your exact design and engineering needs or simply create your own logic.

- ✓ FACE FRAME & FRAMELESS CABINETRY
- ✓ OFFICE FURNITURE
- ✓ WARDROBES
- ✓ SHOP FITOUTS AND BEYOND...
