

THUASNE

ORTHOPAEDICS
2022-2023

THUASNE GROUP

is over 170 years old

From its Saint-Etienne base, THUASNE Group has been drawing on its know-how for more than 170 years to conceive, develop and manufacture medical devices enabling all patients and consumers to become active players in their own health.

Derived from the shared history of 6 generations of entrepreneurs, THUASNE offers concrete, simple, adapted and innovative health solutions for improved mobility, in more than 85 countries. Our expertise is aimed at patients in the fields of orthopaedics (belts, braces), medical compression (phlebology, lymphology, wound healing), women's health (external breast forms, lingerie) and homecare.

With its operations spanning the worlds of medicine, materials and digital technology, Thuasne creates and distributes medical devices enabling all patients and consumers to become active players in their own health. Year after year, our joint commitment enables better management of numerous chronic conditions (back problems, musculoskeletal disorders, venous insufficiency, lymphoedema, etc.) using non-invasive therapeutic solutions

Elizabeth Ducottet
Chairman and CEO

A stylized, handwritten signature in black ink that reads "Elizabeth Ducottet". The signature is written in a cursive, flowing style.

THUASNE

today is...

2 200
employees around
the globe

A presence in
85 countries

14
industrial sites in Europe
and the United-States

22 000
professional customers

30 to 40
new product references
every year

One Thuasne brace sold every
2 seconds
somewhere in the world

15 millions
kilometres of knitted thread

5,000
km of fabric produced/year

The «Made in Thuasne» label

The capacity to fully control every step in the value chain

Because THUASNE is committed to offering patients and health professionals effective, high-quality products, it can guarantee that all its products are designed, made and distributed using technologies mastered by the Group following extensive experience accumulated over the years.

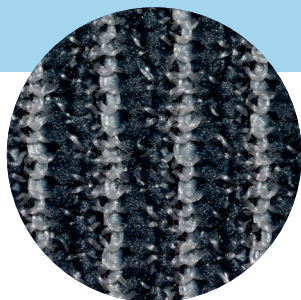

Conceive Create Manufacture Control Supply Deliver.

Knitting expertise for the benefit of patients

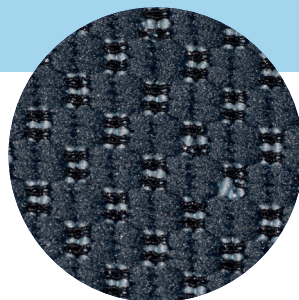

Because THUASNE is committed to patients, its knitted braces are designed using exclusive expertise to promote efficacy, comfort and compliance.

They are **effective** thanks to their compressive properties, restoring proprioception and improving the blood circulation.

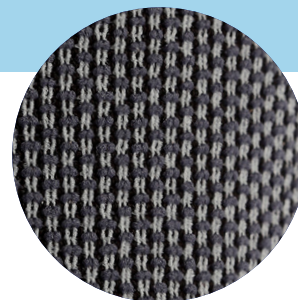

They are **comfortable** thanks to their breathability and specific knit (different techniques and comfort zones).

Integrated silicone knit
for good support

Ventilated knit
for better breathability

Tight, dense knit
for a compressive effect
and improved resistance

Non-compressive tab
for easy fitting

**Less compressive "accordion"
knit** for freedom of movement

Lighter, compression-free knit,
for enhanced comfort behind the
knee, at the elbow crease, etc...

All the medical devices mentioned on this document are CE marked according to the Regulation 2017/745 on medical devices, unless specifically identified as "NOT CE MARKED". Products mentioned in this document are CE class I. Please contact Thuasne should you need any additional information on devices classification. Please carefully read the instructions for use, indications and contraindications of the product. The medical indications for the products are available on certain product pages or summarised on the following product pages: pages 10, 26, 44, 62, 70. The contraindications or precautions for use, where relevant, are also specified for each medical device.

MEASUREMENTS

BACK

Measure the waist circumference at the level of the navel

Measure the hip circumference

NECK

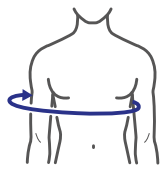

Measure the neck circumference

Measure the neck height, head upright, from the trachea to the chin

SHOULDER - ELBOW

Measure the circumference under the chest with the injured arm.

Measure the arm circumference at the biceps level.

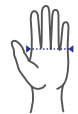

Measure the X cm circumference under the elbow

WRIST - FINGERS

Measure the circumference of the wrist

Measure the width of the hand at the level of the metacarpals

Measure the circumference of the index finger at the base of the nail

Measure the distance between the tip of the injured finger and the wrist

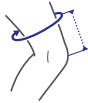

KNEE - CALF

Measure the circumference of the knee in the middle of the patella, knee in slight flexion.

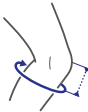

Measure the circumference of the calf 25 mm below the fibular head

Measure the circumference of the thigh at the highest point or X cm above the knee.

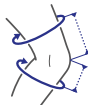

Measure the width of the knee

Measure calf circumference Y cm below the knee.

Measure the size

Measure the circumference of the thigh X cm above the knee and the calf circumference Y cm below the knee.

Measure the floor-to-groin height

ANKLE - FOOT

Measure the circumference of the ankle above the malleoli

Measure the short heel circumference

Foot length

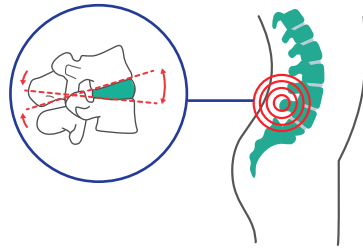

Shoe size (UK)

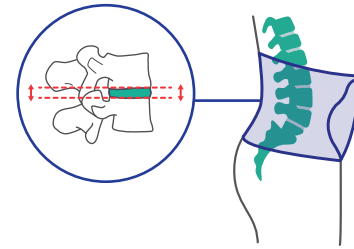

BACK

LUMBAR BELTS: KEY BENEFITS

1 Relieve the lumbar zone Increase in intra-abdominal pressure

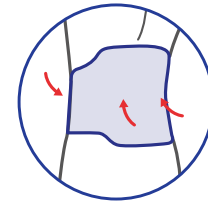

Pain-relieving effect due to compression

Better distribution of load on intervertebral discs

2 Promote a pain-relieving position (posture correction) and limit extreme, painful movements

3 Aid early remobilisation and reduce apprehension about everyday activities

Did you know?

1,500 is the number of times our backs have to work every day.¹

80% of the population will suffer from low back pain once in their lifetime.²

Staying Active is the recommended treatment by the NHS for lower back pain ³

1: The median number of spinal movements performed within 24 h was approximately 4,400. source :Rohlmann A, Consmüller T, Dreischarf M, Bashkuev M, Disch A, Pries E, Duda GN, Schmidt H. Measurement of the number of lumbar spinal movements in the sagittal plane in a 24-hour period. Eur Spine J. 2014 Nov;23(11):2375-84. doi: 10.1007/s00586-014-3588-0. Epub 2014 Sep 20. PMID: 25238799.

BELTS LUMBAR SPINE
Offering reinforced support

LombaFirst

Lumbar support belt

0876 02 (21 cm) - 0875 02 (26 cm)

Indicated for

Non-specific Low Back Pain (acute, subacute, chronic phases).

Lumbar stenosis.

POINTS TO REMEMBER

Discreet and lightweight back brace thanks to its thin fabric and seamless sewing technology

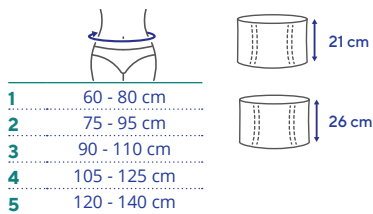

Strong support for an efficient analgesic effect* thanks to the conformable spring-loaded steel stays

Additional strap to reach a higher compression

Finger loops for an easy fitting

Designed angles⁽¹⁾ for more comfort while wearing the belt

Waist circumference

Colour: Black

LombaStart

Lumbar support belt

0874 02 (21 cm) - 0873 02 (26 cm)

Indicated for

Non-specific Low Back Pain (acute, subacute, and chronic phases).

Spinal Stenosis

POINTS TO REMEMBER

Discreet and lightweight back brace thanks to its thin fabric and seamless sewing technology

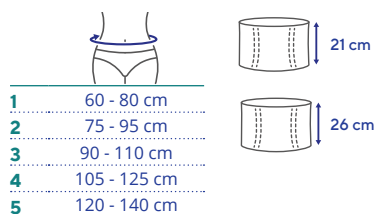

Strong support for an efficient analgesic effect* thanks to the conformable spring-loaded steel stays

Additional strap to reach a higher compression

Finger loops for an easy fitting

Designed angles at hips and ribs area for more comfort while wearing the belt.

Waist circumference

Colour: Black

Presentation video
available online

(1) Less material at hips and ribs area
* internal data

* internal data
(1) The additional strap is doubled to provide more compression than a single strap.
(2) OC1806 In-house study report, 2019.

LombaSkin

"Second skin" compact lumbar support belt

0871 03 (21 cm) - 0870 03 (26 cm)

Indicated for

Non-specific Low Back Pain (acute, subacute, chronic phases).

Lumbar stenosis

Target patient

Low back pain sufferer with moderate physical activity e.g. *sedentary office worker*

POINTS TO REMEMBER

Comfortable to wear thanks to the "second skin effect"⁽¹⁾ especially at the rib and hips area

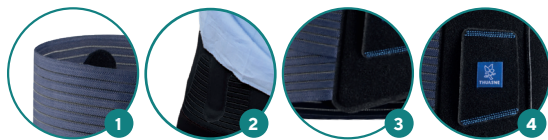

Discreet and lightweight back brace thanks to its thin fabric and seamless sewing technology

Strong support for an efficient analgesic effect* thanks to the conformable spring-loaded steel stays

Specific elastic fabric ensures comfortable feel

Designed angles⁽²⁾ for more comfort while wearing the belt.

Easy care: machine wash at 30°C

Waist circumference

1	60 - 80 cm	
2	75 - 95 cm	
3	90 - 110 cm	
4	105 - 125 cm	
5	120 - 140 cm	

Colour: Black ●

Lombatech®

Adaptable, reinforced lumbar support belt

0852 02 (21 cm) - 0851 03 (26 cm)

Indicated for

Non-specific Low Back Pain (acute, subacute, and chronic phases)

Spinal Stenosis

Target patient

Patient with varied activities or an atypical body shape

POINTS TO REMEMBER

1 - Adaptation to the body's movements: removable additional strap

2 - Precise targeting of painful area: additional strap

3 - Breathability: moisture wicking thanks to Combitec fabric⁽¹⁾ and Coolmax lining

4 - Coverage of a broad range of sizes: to fit as many patients as possible (very slim, large hips, round stomach, etc.)

5 - Easy Care: machine wash at 30 °C

Waist circumference

1	60 - 80 cm	
2	75 - 95 cm	
3	90 - 110 cm

Lombamum®

Posture-correcting
medical maternity belt

0805 01

indicated for

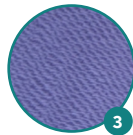

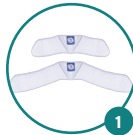

Pregnancy-related low back pain.
Pregnancy-related girdle pain (posterior pelvic pain,
sacro-iliac pain, symphyseal pain)

POINTS TO REMEMBER

- 1 - Adjustable throughout the pregnancy:** 2 abdominal support bands
- 2 - Adjustable support:** adjustable additional straps
- 3 - Comfort:** bamboo fibre lining
- 4 - Easy care:** Machine wash at 30 °C

JANUS 2014
DE LA SANTE

Waist circumference

1 82 - 125 cm

Ortel P

Pelvic belt
2740 01

Indicated for

Pregnancy-related pain girdle (posterior pelvic pain,
sacro-iliac pain, symphyseal pain).

POINTS TO REMEMBER

- Adjustable extra-strong support:** elastic fabric and additional strap
- Comfort:** soft terry lining
- Easy care:** machine wash at 30 °C

Waist circumference

1 83 - 89 cm
2 90 - 96 cm
3 97 - 105 cm
4 106 - 114 cm
5 115 - 125 cm
6 126 - 136 cm

Colour: White

LombaStab

Lumbar support belt with an easy and precise tightening system

0854 02 (21 cm) - 0853 02 (26 cm)

Indicated for

Non-specific low back pain (acute, subacute and chronic phases)

Target patient

Persons looking for an easy and precise tightening to adapt it according to their pain. Persons in prolonged standing position. People lacking strength

POINTS TO REMEMBER

- 1 - Easy and precise tightening¹** thanks to the innovative lacing system
- 2 - Strong support for an efficient analgesic effect*** thanks to the back-plastic plates and the adaptable spring steel stays
Adaptable to the anatomy in A or V-Shape thanks to the innovative quick lacing system and the smart designed angles at hips and ribs area
- 3 - Symmetrical hand loops** to ensure the belt is properly centered on the spine
- 4 - Washable at 30°C**

Waist circumference

1	60 - 80 cm	21 cm
2	75 - 95 cm	26 cm

LombaStab high

Dorso-lumbar support belt with an easy and precise tightening system

0855 01 (35 cm) / 0856 01 (40 cm)

Indicated for

Non-specific low back pain (acute, subacute and chronic phases)
Lumbar-spinal stenosis
Spondylolysis.

Target patient

Persons looking for an easy and precise tightening to adapt it according to their pain. Persons in prolonged standing position. People lacking strength.

POINTS TO REMEMBER

- Easy and precise tightening¹** thanks to the innovative lacing system
- Strong support for an efficient analgesic effect*** thanks to the back-plastic plates and the adaptable spring steel stays
- Specific elastic fabric** to reach the desired level of compression and to ensure a good breathability
- Adaptable to the anatomy in A or V-Shape** thanks to the innovative quick lacing system and the smart designed angles at hips and ribs area
- Symmetrical hand loops** to ensure the belt is properly centered on the spine
- Washable at 30°C**

Waist circumference

1	60 - 80 cm	35 cm
2	75 - 95 cm	40 cm
3	90 - 110 cm	
4	105 - 125 cm	
5	120 - 140 cm

LombaStab immo

Dorso-lumbar support belt with corset and an easy and precise tightening system

0859 01

New

Indicated for

Non-specific low back pain (acute, subacute and chronic phases);
Spinal stenosis
Spondylolysis
Postoperative immobilisation
MODIC type 1

POINTS TO REMEMBER

Easy and precise tightening¹ thanks to the innovative lacing system

Strong support for an efficient analgesic effect* thanks to the back-plastic plates and adaptable back spring steel stays

Specific elastic fabric to reach the desired level of compression

Smart designed angles at hips and ribs area to ensure sitting and standing position comfort while wearing the belt.

Symmetrical hand loops to ensure the belt is properly centered on the spine

Thermoformable corset

Washable at 30°C

Waist circumference

1	60 - 80 cm
2	75 - 95 cm
3	90 - 110 cm
4	105 - 125 cm
5	120 - 140 cm

Colour: Dark Blue

LombaStab dorso

Thoraco-lumbar support belt with an easy and precise tightening system

0847 01

New

Indicated for

Non-specific low back pain (acute, subacute and chronic phases)
Static disorders (kyphosis, lordosis)
Stable vertebral fracture (traumatic, osteoporotic)
Scheuermann's disease

Target patient

Patients with a waist size of between 60 and 140 cm

POINTS TO REMEMBER

3 flexion points thanks to the intra-abdominal pressure and the sternal support maintaining the body in a hyperextension

Easy and precise tightening¹ thanks to the innovative lacing system

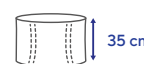

Adaptability to the curvature of the spine thanks to the conformable and height-adjustable back splint.

Comfortable S-Shaped and padded shoulder strap preventing armpit friction.

Easy backpack design to facilitate application and tightening of the shoulder straps.

Specific elastic fabric to reach the desired level of compression and to ensure a good breathability

Waist circumference

1	60 - 80 cm
2	75 - 95 cm
3	90 - 110 cm
4	105 - 125 cm
5	120 - 140 cm

Sleeq® Flex

Universal TLSO

U50401004001

Indicated for

Mild to moderate osteoporosis / compression fractures. Postural issues and kyphosis. Chronic or acute low/mid back pain / osteoarthritis / degenerative disc disease / bulging or herniated disc / low-mid back sprains and strains / lumbar and trunk muscle weakness.

POINTS TO REMEMBER

One size fits all - Easy universal sizing technology fits waist sizes 26 - 57".

Semi-rigid comfort enhancing design.

Highest quality breathable materials.

Ventilated self-moulding support panels.

Wings can be angled and optimized to fit all body types.

Easy to Apply & Wear.

Available extension panel accommodates waist sizes 57 - 65" code UU50401001001.

Sleeq® MAX

Premium Post-Op/Post-Injury TLSO

U50401007001

Indicated for

Postoperative vertebral stabilisation/ fusion. Stable vertebral fractures. Mechanical or discogenic thoracic/lumbar & extremity pain. Degenerative disc disease. Post-injury to facilitate healing. Spondylolysis, spinal stenosis. Spondylolisthesis, spondylosis, laminectomy, discectomy, facet syndrome, spinal muscle weakness, arthritis, low back sprains and strains, prophylactic back support.

POINTS TO REMEMBER

One size fits all - Easy universal sizing technology fits waist sizes 26 - 57".

Rigid Tri-Planar Control: sagittal/coronal/transverse plane motion restriction.

Increased intracavitary pressure to reduce spine & disc loading.

Easy to Apply & Wear.

Steel sternal bar & reinforced panels.

Wings can be angled and optimized to fit all body types.

Available extension panel accommodates waist sizes 57 - 65" code UU50401007001.

BOA Dual TLSO

U50301

Indicated for

Sagittal, coronal, transverse plane motion restriction / increased intracavitary pressure to reduce spine and disc loading / mechanical or discogenic thoracic / lumbar and extremity pain / post-operative spinal stabilization / fusion / degenerative disc disease / post-injury to facilitate healing / spondylolysis / spinal stenosis / spondylolisthesis / spondylosis laminectomy / discectomy / facet syndrome / spinal muscle weakness / arthritis / low back sprains, strains / prophylactic back support.

POINTS TO REMEMBER

Full-circumferential rigid support for the thoracolumbar spine.

Patentend Lacer Design Compression System.

Simple pull straps for easy tightening and adjustment.

Waist circumference

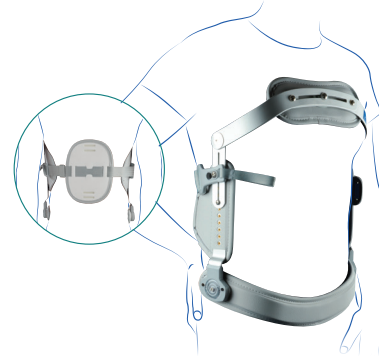

SM	25 - 30"
MD	30 - 35"
LG	35 - 42"
XL	42 - 48"
2X	48 - 57"

Legal manufacturer: Thuasne Deutschland GmbH

DorsoRigid 35

Immobilising spinal
hyper-extension brace

0890 02

Indicated for

Post-operative immobilisation after spinal surgery. Reduction and stabilisation of vertebral fractures with preservation of the posterior wall(T10-L1/L2). Conservative treatment for stable vertebral fractures of the spine (T10-L1/L2). Osteoporotic or metastatic-related compression fractures of the thoracic spine and the dorsolumbar transition (T10-L1/L2). Osteomalacia with fractures. Dorsolumbar osteoarthritis. Osteoporosis and degenerative metastases of vertebral bodies

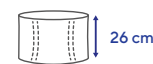

POINTS TO REMEMBER

Resting and static posture correction of the spine thanks to a stabilising and immobilising action, based on three pressure points

Rust-proof and adjustable

Water-resistant, can be worn in the swimming pool for physiotherapy sessions, for example

Waist circumference

1	60 - 80 cm
2	75 - 95 cm
3	90 - 110 cm
4	105 - 125 cm
5	120 - 140 cm

Colour: Grey

Legal manufacturer: Orthoservice Ag.

Cemen

Thoracic and abdominal belt-bandage

2800 02

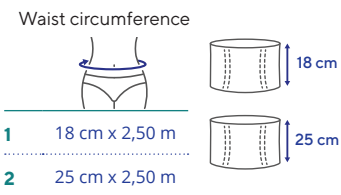

Indicated for

Thoracic and abdominal compression (rib fractures, post-operative complications).

POINTS TO REMEMBER

Strong support: elastic fabric

Easy to put on: self-adhesive fastening

Colour: White

Cemen

Thoracic belt

2900 01

Indicated for

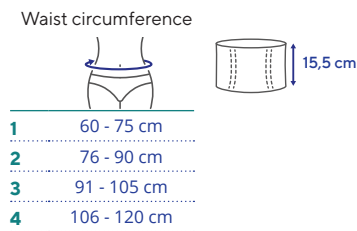

Thoracic compression: rib fractures, surgery, respiratory rehabilitation.

POINTS TO REMEMBER

Strong support thanks to hard-wearing elastic fabric

Easy to put on thanks to self-adhesive fastening

Machine wash at 30 °C

Colour: White

Stomex

Abdominal support belt for stoma patients

2700 02

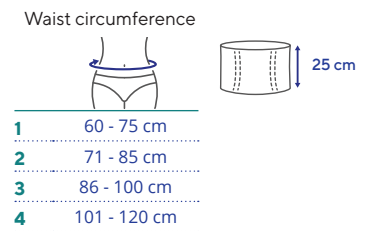

Indicated for

Post-operative abdominal compression.

POINTS TO REMEMBER

Easy to use: front panel in ladder proof fabric, for passing through drains and colostomy bags

Dynabelt

Aerated abdominal support belt

7010 07 (16 cm) - 7010 08 (26 cm)

7010 09 (33 cm)

Indicated for

Support for minor upper and lower back pain
Support of the abdominal wall.

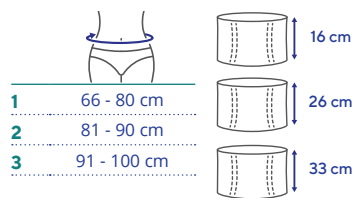

POINTS TO REMEMBER

Comfort and breathability: moisture wicking thanks to Combitex fabric

Easy to use as required: removable support stays

Can be sterilised in an autoclave

Waist circumference

Ortel

Hernia truss

2730 01: unilateral (adaptable for right or left)

/ 2720 01: bilateral

Indicated for

Right or left inguinal hernia
Bilateral inguinal hernias
Pre- or post-operative wear
Permanent wear.

POINTS TO REMEMBER

Adaptable for right or left: exclusive buckle system

Comfort and efficacy: removable and repositionable silicone pads

Easy care: machine wash at 30 °C

Waist circumference

NECK

CERVICAL COLLAR: KEY BENEFITS

Cervical collars immobilise the cervical spine, limiting flexion, extension and rotation movements.

They act on several levels:

- 1 **Pain-relieving effect**
By limiting movements and painful mechanical stresses
- 2 **Relaxing effect**
By increasing local heat, thereby promoting muscle relaxation
- 3 **Limitation/immobilisation of the cervical spine**
Varies depending on the degree of rigidity
- 4 **Stimulation of proprioception**
By reinforcing control sensations from the spinal column

Did you know?

10 to 20%
of adults

suffer from neck pain¹⁻²
The neck is one of the areas of the body most affected by repetitive strain injuries in the office³

1/4 of all people with
an office job

complain of neck pain⁴

People who play **contact sports** (football, boxing, hockey, etc.) are also commonly affected⁵

COMPLETE RESTRICTION OF MOBILITY

Ortel C1 classic

Light cervical collar

2393 02

Indicated for

Torticollis, mild whiplash / mild sprain, cervical osteoarthritis, dropped head syndrome, post-surgery / post-operative, cervical syndrome, rehabilitation after wearing a rigid cervical collar.

Ortel C1 anatomic

Light anatomical cervical collar

2394 02

Indicated for

Analgesic support for the cervical spine (torticollis, benign sprains, cervical arthritis)

Ortel C2 plus

Semi-rigid cervical collar

2392 04

Indicated for

Reinforced and analgesic support for the cervical spine (benign sprains, cervical arthritis, torticollis, cervico-brachial neuralgia)

POINTS TO REMEMBER

Flexible support: high-quality foam

Comfort: removable and washable comfortable cover

Hold: precise self-fastening adjustment

Average height of 8 to 10 cm

POINTS TO REMEMBER

Flexible support: anatomically-shape compact support foam

Comfort: Removable and washable comfortable cover

Hold: precise self-fastening adjustment

Average height of 7.5, 9 or 11 cm

POINTS TO REMEMBER

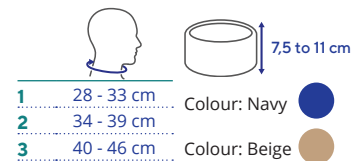

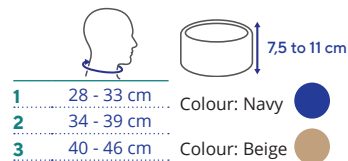

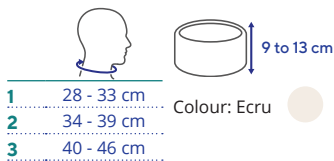

Semi-rigid support: semi-rigid internal structure covered in compact support foam

Comfort: removable and washable comfortable cover

Hold: precise self-fastening adjustment

Anatomical shape

Average height of 7.5, 9 or 11 cm

Ortel C3

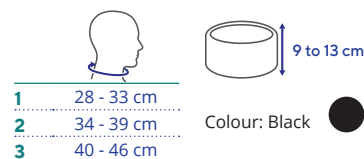

Stiff cervical collar

239102

Indicated for
 Compression of the cervical spine for a strengthening and analgesic result (moderate and benign sprains, cervicobra-

- POINTS TO REMEMBER**
- Reinforced support:** rigid perforated polyethylene structure
 - Comfort:** padding of the edges in contact with the skin, perforations for better ventilation, chin support
 - Hold:** self-fastening adjustment
 - Anatomical fit:** height-adjustable from 9 to 13 cm

Ortel T-Neck

Collar brace for reinforced immobilisation

T49100

Indicated for
 Radicular pain in the cervical spinal region
 Severe whiplash injury
 Moderate to severe cervical syndrome
 Inflammations
 Stable, non-dislocated vertebral body fractures (without neurological symptoms).

- POINTS TO REMEMBER**
- One hand adjustment system** for enhanced ease of use for the patient
 - Anatomically shaped** with rigid frame to provide strong support and reinforced immobilisation of the cervical vertebra
 - Five-steps chin** height for precise adjustments
 - Light weight and comfortable foam pads** to deliver an increased comfort
 - Modern and sober** design

Single size
 Colour: ●

Ortel T-Neck plus

Collar brace for reinforced immobilisation with occipital support

T49105

Indicated for
 Preoperative / Postoperative / Post-traumatic
 Inflammatory disease
 Degeneration
 Severe instabilities of the cervical spine
 Stable, non-dislocated vertebral body fractures (without neurological symptoms)

- POINTS TO REMEMBER**
- Sternal extension** for reinforced occipital immobilisation and stabilization
 - One hand adjustment** system for enhanced ease of use for the patient
 - Anatomically shaped brace** with rigid frame to provide strong support and reinforced immobilisation of the cervical vertebra
 - Five-steps chin** height for precise adjustments
 - Light weight and comfortable foam pads** to deliver an increased comfort
 - Modern and sober** design

Single size

SHOULDER - ELBOW

Did you know?

14 to 20%
of the population

say they are suffering from
shoulder pain on any given day¹

The shoulder is one of the areas of the body most affected by repetitive strain injuries (RSI), particularly rotator cuff tendinitis.

Collar bone fracture:

Children are the most affected

(almost half of all collar bone fractures), followed by men under the age of 30, due to sports injuries²

SHOULDER IMMOBILISERS & ARM SLINGS: KEY BENEFITS

Thuasne shoulder braces can be modular, depending on the models, and accompany patients from the post-traumatic or post-operative immobilisation phase right through to rehabilitation and recovery. There are two different types of immobilisation:

- 1 Immobilisation in neutral position ("Elbow-to-body")** following trauma or surgery
- 2 Functional immobilisation** for rehabilitation and gradual resumption of shoulder movement and/or function

The physician decides on the immobilisation duration on the basis of the severity of the trauma, its nature and the type of associated damage.

Prolonged strict immobilisation can have significant consequences, such as stiffness. It is for this reason that the initiation of a gradual, adapted rehabilitation programme designed to restore pain-free, unrestricted function is recommended*.

ImmoClassic

Scapulo-humeral immobilisation

2445 01

Indicated for

Shoulder and/or elbow injuries or inflammatory conditions.
Conservative treatment for non-surgical proximal humeral fractures.
Shoulder dislocation.
Post-operative immobilisation (such as after rotator cuff surgery or dislocation reduction...).Shoulder subluxation or dislocation prevention (joint instability).
Support for paralytic upper limb.

POINTS TO REMEMBER

Scapulohumeral immobilisation: sleeve and additional strap to support the forearm and shoulder

Adaptability: adjustable upper strap

Comfort: protective foam on the shoulder and neck

1	50 - 71 cm
2	72 - 94 cm
3	95 - 117 cm
4	118 - 140 cm

Colour: Black

ImmoVest

Scapulo-humeral immobilisation vest

2441 02

Indicated for

Uncomplicated shoulder injuries:
- anterior dislocation of the shoulder,
- non-displaced, non-articular fracture of the scapula,
- uncomplicated acromioclavicular dislocation ("separated shoulder").
Immobilisation of the elbow following dislocation.
Fractures of the greater tuberosity of the humerus, humeral head or lesser tuberosity of the humerus (non-surgical indications).
Immobilisation following surgery to correct instability.
Rotator cuff rupture in the acute phase.
Acute scapulohumeral periarthritis ("frozen shoulder").
Paralysis of the brachial plexus.
Re-education of the scapulohumeral joint.
Pain-relieving immobilisation of the shoulder after the inflammatory phase (acute rheumatism, rheumatoid arthritis).

POINTS TO REMEMBER

Immobilisation of the shoulder and elbow: in neutral position thanks to the 3 straps

Reinforced protection: high coverage vest

Comfort: anatomically shaped breathable fabric and comfort pad on the shoulder

Easy to fit: numbered and coloured marking system

HEIGHT	CORPULENCE		
			
< of 1.70 m	Size 1		
1.70 - 1.80 m			Size 2
> of 1.80 m			

Colour: Black

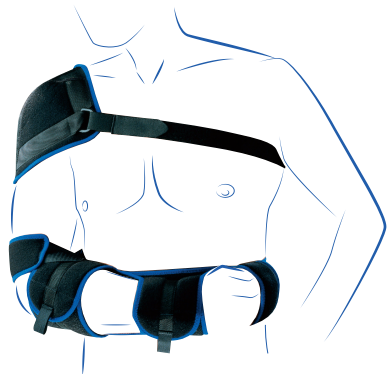

Fitting video available online

Immo

Immobilisation vest with forearm and hand bands

2440 01

Indicated for

Analgesic immobilisation of the shoulder, arm and forearm following:
 Non-surgical shoulder and elbow injuries (dislocations or sprains).
 Arm muscle injuries.
 Non-surgical shoulder and elbow bone injuries.
 Shoulder tendon injuries.

POINTS TO REMEMBER

Immobilisation of the elbow against the torso through its reinforced belt and support bands

Better comfort thanks to the belt that supports the arm, **no pressure on the shoulder and neck**

Easy for the patient to put on with its **self-fastening** attachment

1	50 - 71 cm
2	72 - 94 cm
3	95 - 117 cm
4	118 - 140 cm

Colour: Black ●

Ligaflex® clavicular straps

Clavicular immobilisation strap

2450 02

Indicated for

Displaced or non-displaced clavicle fractures.

POINTS TO REMEMBER

Adaptability: one size fits all with trimmable straps to fit all morphologies

Comfort: dorsal foam anchoring pad and quilted straps

Easy to fit: buckle closure

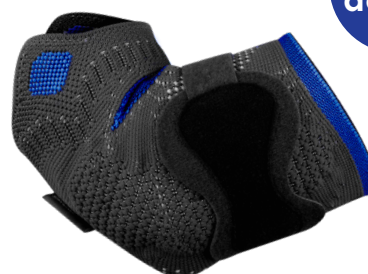

Single size / Colour: Black ●

Silistab® Epi

Anti-epicondylitis brace

2305 03

New design

Indicated for

Insertion epicondylitis (tennis elbow) and epitrochleitis (functional treatment).

Prevents against future recurrence and gives active support for sports activities.

Ideal for manual work situations.

POINTS TO REMEMBER

Proprioception: anatomical compressive knit and adjustable pressure thanks to the additional removable strap

Comfort: silicone inserts and anatomical knit with comfort areas on the epicondyles

Easy to fit: visual markers at the hollow and tip of the elbow for precise positioning.

Practical: pull tabs for ease of application

Universal

1	19 - 22 cm
2	22 - 25 cm
3	25 - 28 cm
4	28 - 31 cm
5	31 - 34 cm
6	34 - 37 cm

Colour: Grey/Dark Blue

Fitting video available online

Epi-Med

Rigid armband

T480013

Indicated for
 Inflammatory pathologies
 Epicondylitis
 Epitrochleitis

POINTS TO REMEMBER

Comfort: felt lining for targeted pressure around the epicondyles
Easy adjustment: pressure adjustment thanks to a self-fastening closure

5 cm
XS 22 - 23 cm
S 24 - 25 cm
M 26 - 27 cm
L 28 - 30 cm
XL 31 - 34 cm

Universal

Colour: Grey

Epi-Med PROMASTER

Preventive rigid armband with silicone pads

T35087

Indicated for
 Inflammatory pathologies (Prevention of recurrence):
 Epicondylitis
 Epitrochleitis

POINTS TO REMEMBER

Comfort: silicone inserts for targeted double pressure around the epicondyles and additional inserts included (Flexi Pads) to adjust the pressure
Easy adjustment: pressure adjustment thanks to a self-fastening closure system with immobilisation indication area

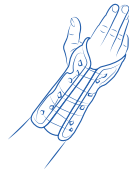

8 cm
XS 22 - 23 cm
S 24 - 25 cm
M 26 - 27 cm
L 28 - 30 cm
XL 31 - 34 cm

Version : Universal
 Colour: Grey

WRIST-THUMB

FUNCTION OF SPLINTS

WRIST SPLINT

Varying degrees of immobilisation of the carpometacarpal joints. Used mainly for sprains, wrist instabilities, tendinitis of the wrist, carpal tunnel syndrome that has not undergone surgery and during the post-operative phase.

WRIST/THUMB SPLINT

Varying degrees of immobilisation of the carpometacarpal joints and the thumb. Used in the event of trauma (sprains and fractures), wrist and thumb instabilities, tendinitis of the wrist and De Quervain's tenosynovitis, basal joint arthritis of the thumb and during the post-operative phase.

THUMB SPLINT

Stabilisation of the thumb in the required therapeutic position. Mainly used in basal joint arthritis of the thumb or thumb sprains.

WRIST-FINGER SPLINT

Varying degrees of immobilisation of the metacarpophalangeal and interphalangeal joints. Used in the event of sprains, dislocations, non-displaced fractures or in the post-operative phase.

Did you know?

Carpal tunnel syndrome, due to median nerve compression, represents almost all repetitive strain injuries of the wrist⁽¹⁾. It is caused by repeated flexion/extension movements, tight gripping, pressure on the palm and vibrations (vibrating tools), etc...

1/4 pregnant women

are affected by carpal tunnel syndrome. In this case, the trigger is fluid retention, causing the tissues to swell and compress the median nerve.

130,000

is the number of wrist fractures every year, often due to a fall⁽²⁾.

Sport is also one of the biggest causes of injury. For example, 3/4 of all handball injuries affect the fingers⁽³⁾.

Ligaflex® Action

Flexible wrist stabilising brace with removable palmar stay

2436 02

Indicated for

Wrist sprain.
Post-operative, post-traumatic residual pain and/or oedema.
Wrist tendinopathies.
Wrist osteoarthritis.

POINTS TO REMEMBER

Modular support: conformable and removable palmar stay

Proprioception: Compressive knit and additional removable strap to increase the pressure in the pain area

Comfort: silicone insert on the ulnar condyle. Anatomical and elastic knitting

1	14 - 15 cm		
2	15 - 16 cm		
3	16 - 17 cm		
4	17 - 18 cm		
5	18 - 19 cm		
6	19 - 20 cm		

Colour: Grey

Ligaflex® Classic

Wrist immobilisation splint

2435 02

Indicated for

Wrist sprain.
Non-surgical wrist fracture.
Post-operative or post-traumatic wrist immobilisation.
Wrist tendinopathies.
Conservative treatment of carpal tunnel syndrome.
Lateral epicondylitis.
Rheumatoid arthritis.
Wrist osteoarthritis.

TARGET PATIENT

Patient without oedema

POINTS TO REMEMBER

Strict immobilisation of the joint: rigid, anatomical and conformable palmar stay

Comfort: soft and breathable 3D knit for prolonged wear

0	10 - 13 cm		
1	13 - 15 cm		
2	15,5 - 17,5 cm		
3	18 - 20 cm		
4	20,5 - 23 cm		

Colour: Black

Ligaflex® Manu

Wrist and thumb immobilisation splint

2430 02

Indicated for

Thumb sprain.
Wrist and/or thumb sprain.
Non-surgical scaphoid fracture.
Non-surgical wrist fracture.
Post-operative or post-traumatic wrist/thumb immobilisation.
Wrist and/or thumb tendinopathies.
De Quervain tenosynovitis.
Rheumatoid arthritis.
Lateral epicondylitis.
Conservative treatment of carpal tunnel syndrome.
Thumb/wrist osteoarthritis.
Neuro-muscular impairments (contracture, hand drop or spasticity...).

POINTS TO REMEMBER

Immobilisation of the wrist and thumb via 2 rigid, malleable and anatomical palmar stays

Aerated, foam lined fabric

Dual strap system ensuring even compression

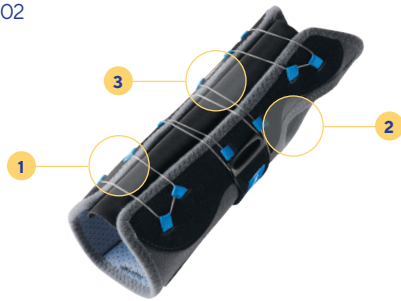

0	10 - 13 cm		
1	13 - 15 cm		
2	15,5 - 17,5 cm		
3	18 - 20 cm		
4	20,5 - 23 cm		

Colour: Black

Ligaflex® pro

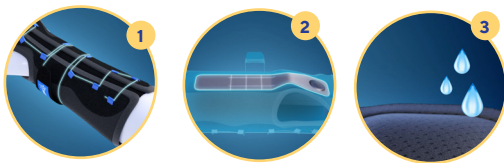

Wrist immobilisation splint with quick lacing system

2433 02

Indicated for

- Wrist sprain.
- Non-surgical wrist fracture.
- Post-operative or post-traumatic wrist immobilisation.
- Wrist tendinopathies.
- Conservative treatment of carpal tunnel syndrome.
- Lateral epicondylitis.
- Rheumatoid arthritis.
- Wrist osteoarthritis.

POINTS TO REMEMBER

- 1 - Easy and quick to put on:** Quick lacing system
- 2 - Firm support:** conformable palmar stay on the palm of the hand
- 3 - Comfortable and breathable:** soft, protective jersey lining and breathable 3D knit

Universal

- 1 13 - 17 cm
- 2 17 - 23 cm

Colour: Grey ●

Extra tip!

Relieve pain, sprains, tendinitis...

Apply **ARGICALM®**

Ligaflex® pro +

Wrist and thumb immobilisation splint with quick lacing system

2434 02

Indicated for

- Thumb sprain.
- Wrist and/or thumb sprain.
- Non-surgical scaphoid fracture.
- Non-surgical wrist fracture.
- Post-operative or post-traumatic wrist/thumb immobilisation.
- Wrist and/or thumb tendinopathies.
- De Quervain tenosynovitis.
- Rheumatoid arthritis.
- Lateral epicondylitis.
- Conservative treatment of carpal tunnel syndrome.
- Thumb/wrist osteoarthritis.
- Neuro-muscular impairments (contracture, hand drop or spasticity...).

POINTS TO REMEMBER

- Easy and quick to put on:** Quick lacing system
- Firm support for thumb and wrist:** 2 conformable palm stays
- Comfortable and breathable:** soft, protective jersey lining and breathable 3D knit
- 2 models:** right and left

- 1 13 - 15 cm
- 2 15,5 - 17,5 cm
- 3 18 - 20 cm
- 4 20,5 - 23 cm

Colour: Grey ●

Extra tip!

Basal joint arthritis

For night-time use, recommend Ligaflex® pro + to reduce muscle tension and relieve pain.

Presentation video available online

Ligaflex® Rhizo Pro

Thumb splint

T4802732

Indicated for

Thumb sprain.
Immobilisation in case of pain or trauma of the thumb.
Post-operative immobilisation.

POINTS TO REMEMBER

Efficacy of the thumb immobilisation: rigid plastic shell over the thumb

Comfort: perforated shell with soft ventilated fabric lining

Ease of use: easy to put on with wide strap at the wrist

Universal product

- 1 13 - 17 cm
- 2 17 - 23 cm

Colour: Black ●

Ligaflex® Rhizo

Static thumb splint in analgesic position

7090 02

Indicated for

Immobilisation in case of pain or trauma of the thumb.
Post-operative immobilisation.
Thumb osteoarthritis (including rhizarthrosis).

POINTS TO REMEMBER

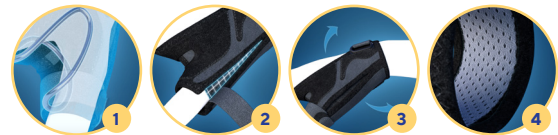

1 - Immobilisation in a painless position: metal frame

2 - Comfort: opening at the thumb to prevent any pressure on the painful zone

3 - Freedom of movement: preserves gripping and pinching movements and range of motion of the wrist

4 - Breathable: breathable 3D knit

2 models: right and left

- 1 13 - 15 cm
- 2 17 - 23 cm

Colour: Grey ●

Presentation video available online

Extra tip!

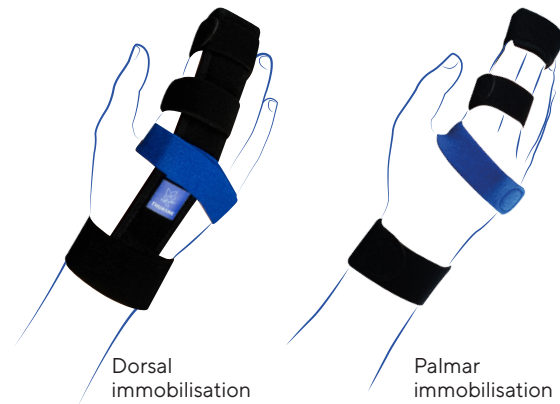

Rhizarthrosis

For daytime use, recommend Ligaflex® Rhizo to reduce muscle tension and relieve pain.

Ligaflex Finger®

Wrist and finger immobilisation splint 2nd, 3rd or 4th metacarpals

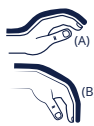

2432 02

Indicated for

Finger injuries (sprains, dislocations, ligament ruptures...)
Post-traumatic immobilisation.

POINTS TO REMEMBER

Modular immobilisation thanks to conformable stays for:

- Immobilisation of metacarpal-phalangeal joints (A)
- Immobilisation of interphalangeal joints (B)

Adaptability and support 4 straps (2 fixed and 2 removable) and 2 immobilisation possibilities (palmar or dorsal) according to the prescriber's recommendations

Comfort: Protected injured fingertips and specific cutting of the wrist strap

1	< 13 cm	 Universal
2	13 - 16 cm	
3	16 - 19 cm	
4	19 - 22 cm	

Colour: Black/Dark Blue

Presentation video available online

Ligaflex Boxer®

Immobilisation splint wrist, hand, fingers 4th or 5th metacarpals

2431 02

Indicated for

Non-surgical 4th and 5th metacarpal fracture.
Post-operative 4th and 5th metacarpal support.
Residual symptoms post fractured or sprained finger (of 4th and 5th).
Following strict plaster cast immobilisation

POINTS TO REMEMBER

Strict immobilisation of the wrist up to the 4th and 5th fingers: 2 conformable and removable stays with specific angulation (dorsal at 90° and palmar at 20°)

Comfort: Lightweight and breathable 3D fabric for prolonged wear. Protection of immobilised fingers thanks to interdigital separation

Easy to fit: full opening

1	13 - 15 cm	 Left Right
2	15,5 - 17,5 cm	
3	18 - 20 cm	
4	20,5 - 23 cm	

Colour: Black/Dark Blue

Presentation video available online

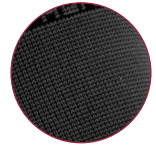

KNEE

FUNCTION OF KNEE BRACES AND KNEE SPLINTS

PROPRIOCEPTIVE KNEE BRACE

Improved proprioception via the use of a compressive knit

PATELLAR KNEE BRACE

Patella supported by the ring and proprioceptive effect thanks to the compressive knit

PATELLO-FEMORAL KNEE BRACE

Patella realignment in its physiological axis and proprioceptive effect thanks to compressive knit

LIGAMENT KNEE BRACE

Stabilizes the knee via the use of hinged reinforcements

OFFLOADING KNEE BRACE

Offload of the damaged compartment thanks to a 3-point system

KNEE SPLINT

Pain management and protective effect due to complete immobilisation of the knee

Did you know?

Knee injuries are often linked to sports.

For example, 1/3 of skiing injuries involve the knee¹

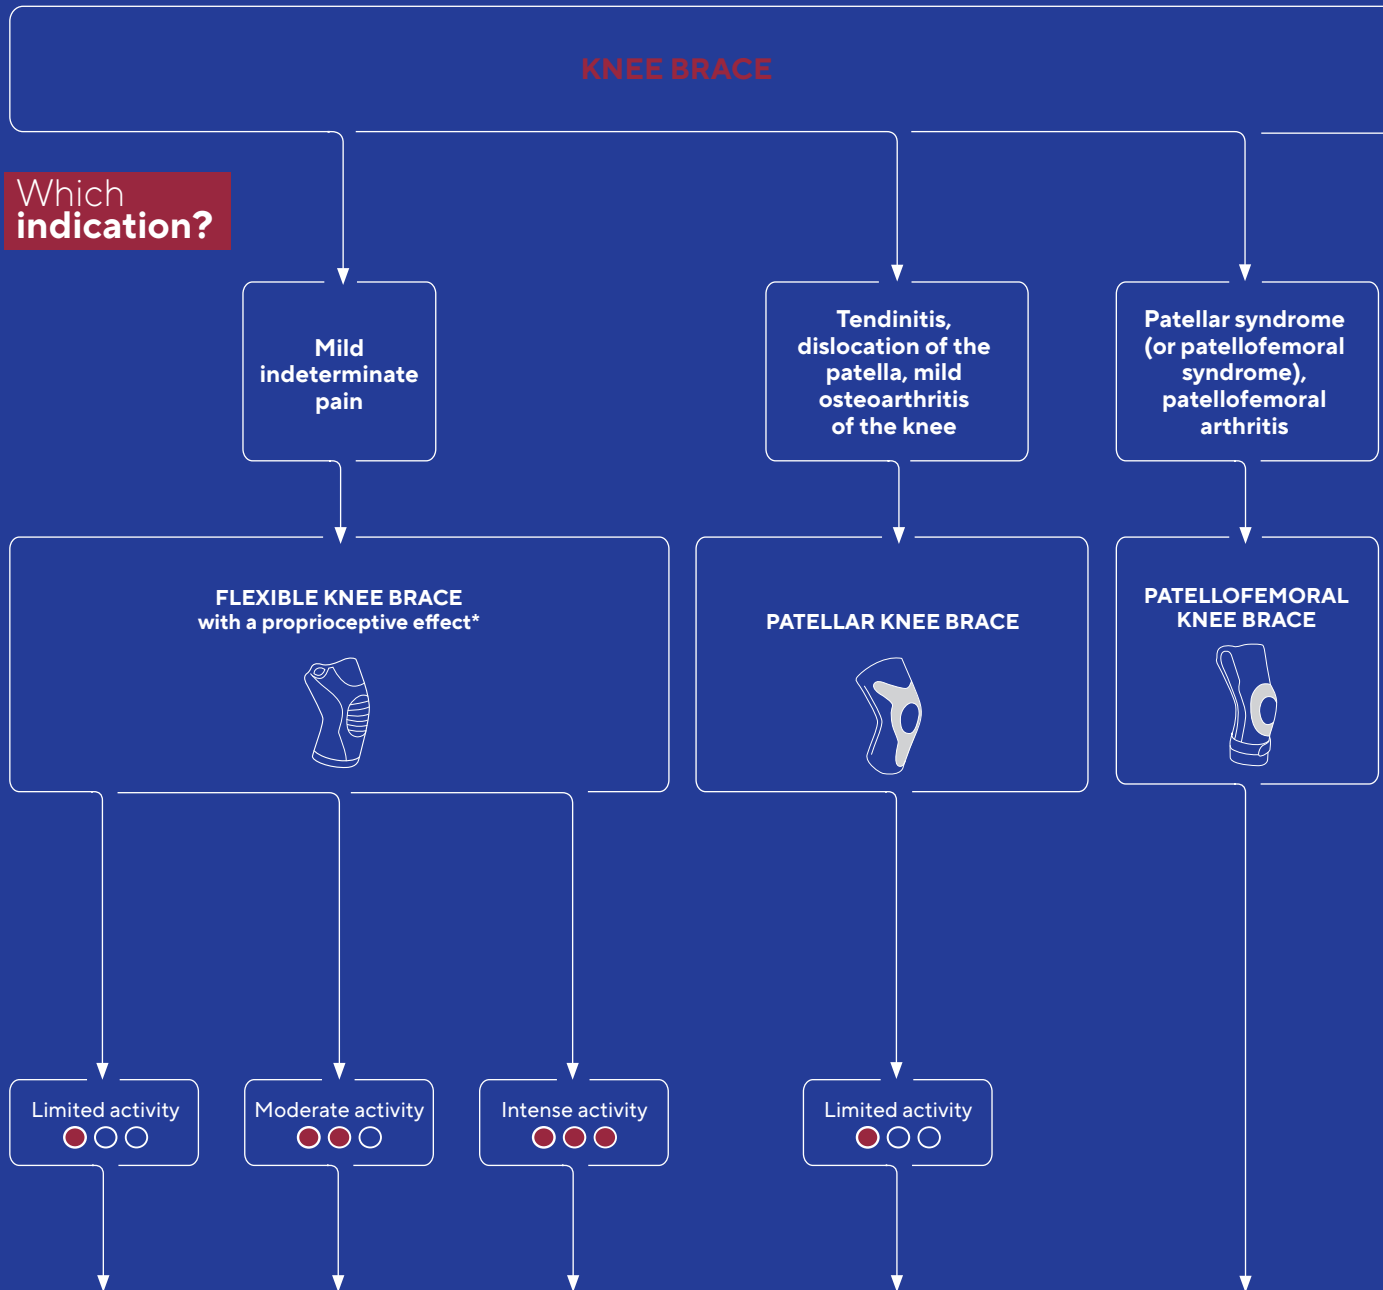

30% of arthritis cases concern the knee joint²

GenuSoft

Proprioceptive elastic knee support (15 – 20 mmHg)

2320 03

Indicated for

Knee pain and/or swelling management.
Proprioceptive support for rehabilitation.

Target patient

Patient with limited activity

POINTS TO REMEMBER

Comfortable to wear: anatomically-shaped knit with comfort zone behind the knee

Proprioception: elastic compressive knit (15 – 20 mmHg)

1	32 - 34 cm
2	35 - 37 cm
3	38 - 41 cm
4	42 - 45 cm
5	46 - 49 cm

Colour: Sliver ●

GenuAction

Proprioceptive elastic knee support (20 – 36 mmHg)

2325 03

Indicated for

Joint instability/laxity.
Proprioceptive support for rehabilitation

Target patient

Patient with moderate activity

POINTS TO REMEMBER

Comfortable to wear: anatomically-shaped knit with comfort zone behind the knee and over the kneecap

Proprioception: elastic compressive knit (20 – 36 mmHg)

0	28 - 31 cm
1	32 - 34 cm
2	35 - 37 cm
3	38 - 41 cm
4	42 - 45 cm
5	46 - 49 cm
6	50 - 53 cm

Colour: Grey ●

GenuExtrem

Proprioceptive elastic knee support with lateral reinforcements (20 – 36 mmHg)

2321 02

Indicated for

Protection and prevention during sports activities.
Proprioceptive support for rehabilitation.

Target patient

Patient with intense activity

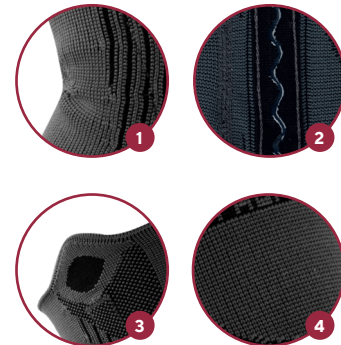

POINTS TO REMEMBER

1 - Comfortable: anatomically-shaped knit with comfort zones behind the knee and over the kneecap

2 - Support and hold: flexible side stays with anti-slip system

3 - Practical: pull tabs for ease of application

4 - Proprioception: elastic compressive knit (20 – 36 mmHg)

1	32 - 34 cm
2	35 - 37 cm
3	38 - 41 cm
4	42 - 45 cm
5	46 - 49 cm
6	50 - 53 cm

Colour: Grey ●

Ligastrap® Genu

Ligament knee brace
(20 – 36 mmHg) with
functional strapping

2170 03

Indicated for
Joint instability/laxity.
Knee pain and/or swelling management.
Sport activities resumption.

Target patient
Resumption of sports, sport not authorised with rigid stays

POINTS TO REMEMBER

Reinforced support: double strapping system and flexible side stays

Comfortable to wear: anatomically-shaped knit with comfort zones behind the knee and over the kneecap

Practical: pull tabs and fitting guidance on the straps

Proprioception: elastic compressive knit (20 – 36 mmHg)

1	32 - 34 cm
2	35 - 37 cm
3	38 - 41 cm
4	42 - 45 cm
5	46 - 49 cm
6	50 - 53 cm

Colour: Grey ●

Knee

PATELLAR AND PATELLO-FEMORAL
KNEE BRACES

Silistab® Genu

Knee brace with shock-absorbing patellar guide (15 – 20 mmHg)

2340 05 (white) - 2345 04 (black)

Patellar insert

Indicated for

Knee pain and/or swelling management.
Patella pain and instabilities.
Knee osteoarthritis (mild to moderate).

Target patient

Patient with limited activity
Patient with mild knee osteoarthritis

POINTS TO REMEMBER

Patella support: anatomical insert

Joint support and hold: flexible side stays with anti-slip system

Comfort: anatomically shaped knit, open behind the knee

Proprioception: elastic compressive knit (approximately 17 mmHg)

Product height
31 to 35 cm

- 1 31 - 33 cm
- 2 34 - 36 cm
- 3 37 - 39 cm
- 4 40 - 42 cm
- 5 43 - 45 cm
- 6 46 - 48 cm

White
with open kneecap

Black
with closed kneecap

Patellar bandage Preventive orthotic

2304 01

Indicated for

Prevention of tendinitis of the patellar tendon

Target patient

Patient taking part in sports with risk of recurrence

POINTS TO REMEMBER

Patella support: anatomical shape applying local pressure over the patellar tendon

Proprioception: silicone with dimpling for a massage effect

Unique size 26 - 50 cm

Colour: Black

PatellaReliever

Hinged knee orthosis with patella traction system

2348 01

Patellar insert

Indicated for

Femoro-patellar pain syndrome and/or patella instability.
Femoro-patellar osteoarthritis (mild to moderate).
Anterior knee or patella pain.
Patella luxation and subluxation.

Target patient

Patient with pain behind the patella, for example after relatively prolonged sitting, when going down steps

POINTS TO REMEMBER

Patella realignment: half-moon patellar insert with strap and lace kneecap traction system

Joint support: hinged stay

Hold: silicone integrated into the knit

Comfort: anatomically shaped knit with comfort zones

Practical: pull tabs for ease of application

2 models: right – left

1	32 - 34 cm
2	35 - 37 cm
3	38 - 41 cm
4	42 - 45 cm
5	46 - 49 cm
6	50 - 53 cm

Colour: Grey/Blue

Presentation video available online

Genu Dynastab®

Hinged ligament knee brace

2370 06

New design

Indicated for

Conservative treatment of knee ligament injuries (lateral ligaments).
Joint instability/laxity.
Sport activities resumption.

Target patient

Resumption of sports, patient requiring moderate support

POINTS TO REMEMBER

Joint support: bi-axial hinge

Hold: silicone integrated into the knit

Comfort: anatomically shaped knit with comfort zones and half-straps to prevent any tourniquet effect

Practical: pull tabs for ease of application

1	32 - 34 cm
2	35 - 37 cm
3	38 - 41 cm
4	42 - 45 cm
5	46 - 49 cm
6	50 - 53 cm

Colour: Grey

Genu Ligaflex®

Ligament knee brace with TM5 hinge

2375 06 (closed) - 2375 05 (open)

Indicated for

Conservative treatment of knee ligament injuries.
Joint instability/laxity.
Knee pain and/or swelling management.
Sport activities resumption.

Target patient

Resumption of sports, patient requiring strong support

POINTS TO REMEMBER

Joint support: TM5 hinge reproducing the knee's natural movements*

Hold: silicone integrated into the knit and suspension strap above the calf

Comfort: anatomically shaped knit with comfort zones and half-straps to prevent any tourniquet effect

Practical: pull tabs and different versions to adapt to requirements (short and long version, open or closed model)

CLOSED VERSION	1	2	3	4	5	6
	32 - 34 cm	35 - 37 cm	38 - 41 cm	42 - 45 cm	46 - 49 cm	50 - 53 cm

Colour: Grey ●

Closed available in short only. Open available in short and long.

Presentation video available online

Genu Ligaflex® ROM

Ligament knee brace with flexion/
extension control

2386 05 (open)

Indicated for

Conservative treatment of knee ligament injuries and/or ruptures (cruciate and/or lateral ligaments).
Post-operative rehabilitation.
Joint instability/laxity.

Target patient

Patient following severe sprain or during rehabilitation

POINTS TO REMEMBER

Joint support: TM5+ hinge reproducing the knee's natural movements*

Range of motion control: tool-less limitation of flexion and extension with extensive adjustment range

Hold: silicone integrated into the knit and suspension strap above the calf

Comfort: anatomically shaped knit with comfort zones and half-straps to prevent any tourniquet effect

Flexion/Extension adjustment ranges

Flexion	0°	30°	45°	60°	75°	90°	-
Extension	0°	5°	10°	15°	20°	30°	40°

1	32 - 34 cm
2	35 - 37 cm
3	38 - 41 cm
4	42 - 45 cm
5	46 - 49 cm
6	50 - 53 cm

Presentation video available online

Ligaflex® Immo

Modular immobilisation splint to fit all body shapes

2400 04

Indicated for
Knee pain management.
Post-operative and post-traumatic immobilisation.

Target patient
Difficult-to-fit patients

POINTS TO REMEMBER

- Immobilisation:** 4 conformable stays
- Hold:** anti-slip system and tightening straps
- Practical:** 3 mobile side panels to fit most calf and thigh circumferences

1	50 - 60 cm
2	60 - 70 cm
3	70 - 80 cm
4	> 80 cm

Colour: Navy 

Extra tip!

For the resumption of activities, recommend **Ligastrap® Genu** to protect the joint!

ROM-R

Post-operative splint with flexion/extension limitation

U04602

Indicated for
Post-operative immobilisation or/and rehabilitation.
Post-traumatic immobilisation.
Joint instability/laxity.
Conservative treatment of knee ligament injuries and/or ruptures

Target patient
Patient with a severe ligament injury or post-operatively

POINTS TO REMEMBER

- Immobilisation:** 2 conformable lateral frames
- Tool-less adjustment** of the articulation, by 15° steps in flexion (from 0° to 120°) and extension (from 0° to 105°)
- DropLock system can be locked by **15° steps from 0° to 90°**
- Tool-less length adjustment** (proximal and distal)
- Easy to use buckles

Flexion/Extension adjustment ranges

Limitations flexion	0°	15°	30°	45°	60°	75°	90°	105°	120°
Limitations extension	0°	15°	30°	45°	60°	75°	90°	105°	
Total immobilisation	0°	15°	30°	45°	60°	75°	90°		

Product height
48 to 66 cm

SINGLE SIZE

Rebel Standard Ligament

Off The Shelf

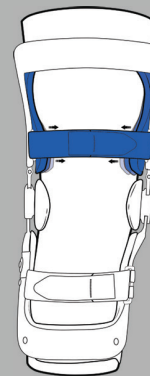

Patients who have experienced ligament injuries and/or reconstructive surgery. For rehabilitative or prophylactic use.

Features

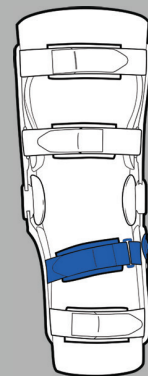

- Stock sizes see chart
- Enhanced brace positioning via Townsend Motion TM5+ Hinge- tracks with the anatomical roll-and-glide motion of the knee to keep the brace properly positioned on the leg.
- Superior suspension via synergistic suspension strap
- Improved suspension via C/S package
- Rotational control via tibial shell contour
- Suspension augmentation via anti-migration straps
- Easy donning via clip buckles
- Suitable for the majority of patients
- ACL configuration

Anti-migration Technology

Rebel PRO Ligament Custom

Patients who have experienced ligament injuries and/or reconstructive surgery. For rehabilitative or prophylactic use.

Features

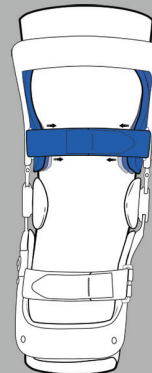

- Optimised & customised fit - Custom assembled to 3 leg measurements
- Enhanced brace positioning via Townsend Motion TM5+Hinge- tracks with the anatomical roll-and-glide motion of the knee to keep the brace properly positioned on the leg.
- Superior suspension via synergistic suspension strap
- Improved suspension via C/S package
- Rotational control via tibial shell contour
- Suspension augmentation via anti-migration straps
- Easy donning via clip buckles
- Suitable for heavy users and contact sports- rigid aircraft aluminium frame

Options

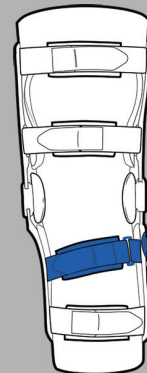

- Extension assist kit- suitable for patients who present with quadriceps weakness or fatigable quadriceps
- Frame height options
- Frame configuration options
- Flexion Stop Kit
- Range of colours

Anti-migration Technology

C/S Package
(Compression/Suspension)

Synergistic Suspension Strap

Powdercoat Colours

Rebel Lock

Off The Shelf

Product Code:
Standard - U30202
Semi-Custom - U30201

Indications

- Patients with significant instabilities; weak extensor muscles, failed TKR, limiting or preventing knee flexion.
- A lightweight option for patients who need stability and functionality to control significant instabilities.

Features

- Superior suspension via synergistic suspension strap
- Improved suspension via C/S package
- Rotational control via tibial shell contour
- Suspension augmentation via anti-migration straps
- Lightweight Aircraft Aluminium Frame
- Drop Lock With Free Motion
- Adjustable Locking Position

Options

- Optimised & customised fit - Custom assembled to 3 leg measurements
- Extension assist kit - suitable for patients who present with quadriceps weakness or fatigable quadriceps
- Frame height options
- Flexion stops at 30, 60, or 90 degrees
- Range of colours (stock frame colour is black)

Extension Assist

This optional extension assistance mechanism uses strong latex bands slipped over two posts – one proximal and one distal – to the knee centre. There is no limitation in flexion.

Sprystep Knee Orthosis (KO)

Custom

Strong, thin and lightweight. Custom knee orthoses that are elegant and functional.

Features

- The Sprystep Knee Orthosis leverages advanced composite materials to provide elegant and high quality solutions.
- Varied geometry options dependent upon the biomechanical aim
- Moderate stiffness with the option to reinforce.
- Anatomical contours for comfort on force pattern application
- Extremely lightweight and thin
- Full range of Townsend joints are applicable. Requests can be made for TM5, Single Pivot, Five Bar with accessories such as trigger release, twist cable or bump and range stops.

ActionReliever

Off-loading knee brace for the treatment of knee osteoarthritis

2349 01

Indicated for

Symptomatic unicompartmental femorotibial osteoarthritis (mild to moderate).
Knee off-loading for post-traumatic, post-operative or degenerative conditions.
Knee pain and/or swelling management.

Target patient

Patient with mild to moderate pain.
Patient with moderate activity

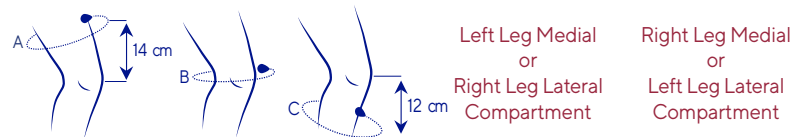

POINTS TO REMEMBER

Offloading of the injured compartment: 3-point support system thanks to inelastic straps that ensure maximum off-loading of the knee in extension

Stabilisation of the joint: rigid joint on the injured side and flexible on the healthy side and patellar silicone insert

Support and comfort: silicone integrated into the knit and anatomical knitting with comfort areas

Available in medial left / lateral right and medial right / lateral left

Size	A	B	C	Code	Code

Colour: Grey/blue

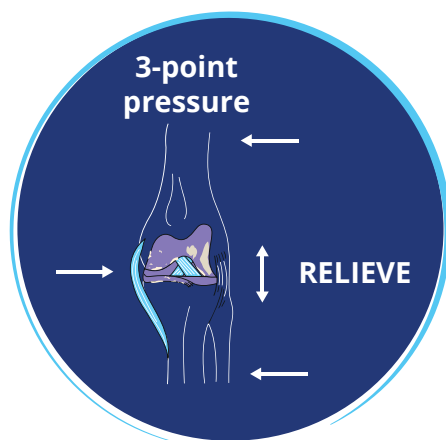

ActionReliever

Three point Pressure System

The Thuasne ActionReliever is an off-loading brace that has been designed to apply corrective forces on the leg to reduce the load of the compartment affected by osteoarthritis (referred to as three point pressure).

By helping hold the leg in a normal alignment and maintaining a homogeneous load on the knee joint as a whole, the ActionReliever knee brace will help reduce compression and inflammation. This load reduction is proven to relieve pain.

POINTS TO REMEMBER

Dynamic Off-Loading

- Straps creating a dynamic three point pressure system: most effective on heel strike.
- Combined rigid adjustable hinge on the affected side and flexible stay on the unaffected side.
- Self adjustment possible by tightening the front straps.
- For medial or lateral osteoarthritis.

Ease Of Use

- Only two steps for fitting.
- Easy to put on and take off.

Comfort

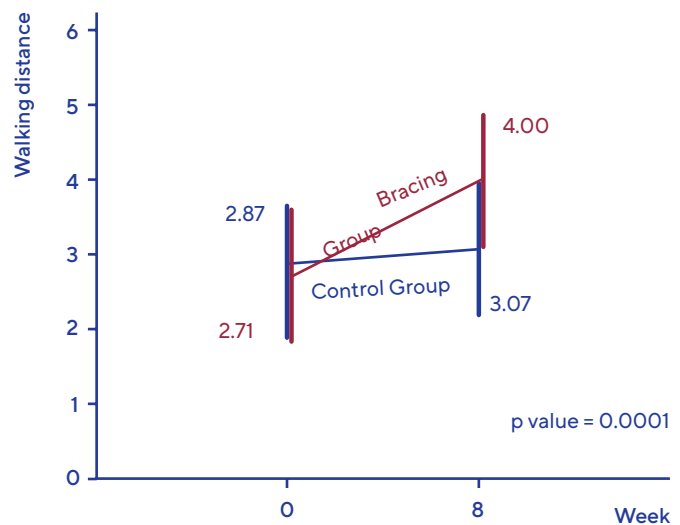

- Anatomically shaped straps, self-oriented and adjustable.
- Anatomical knitting with no compression areas at popliteal crease and at brace edges.
- Stays comfortable all day.
- Slim and discreet under clothing.

Patients with Knee Osteoarthritis

Randomised Controlled Study with 32 Patients on 8 Weeks:
17 bracing group, 15 control group*

Main Objective:

Effect of the brace on the pain free walking distance

"By wearing the brace, the pain on exertion was reduced and the pain-free distance extended**"

*Benning M, Schneider-Nieskens R; Superiority of a Knee Relief Orthosis in the Treatment of Kne Osteoarthritis. Orthopädie Technik 08/17: 24-30

Presentation video available online

Rebel Reliever®

Off-loading knee brace

U03309

Indicated for

Moderate to severe unicompartement femoral-tibial osteoarthritis of the knee.

Unicompartement knee joint degeneration requiring offloading. Post-operative offloading of a single compartment (articular or meniscus cartilage defect or osteochondral defect).

Knee joint instability after injury or surgery on the cruciate and/or collateral ligaments (ACL, PCL, LCL, MCL).

Target patient

Arthritic patient requiring maximum offloading

POINTS TO REMEMBER

Offloading of the damaged compartment: 3-pressure point system with Loadshifter system

Freedom of movement: TM5+ hinge reproducing the knee's natural movements.*

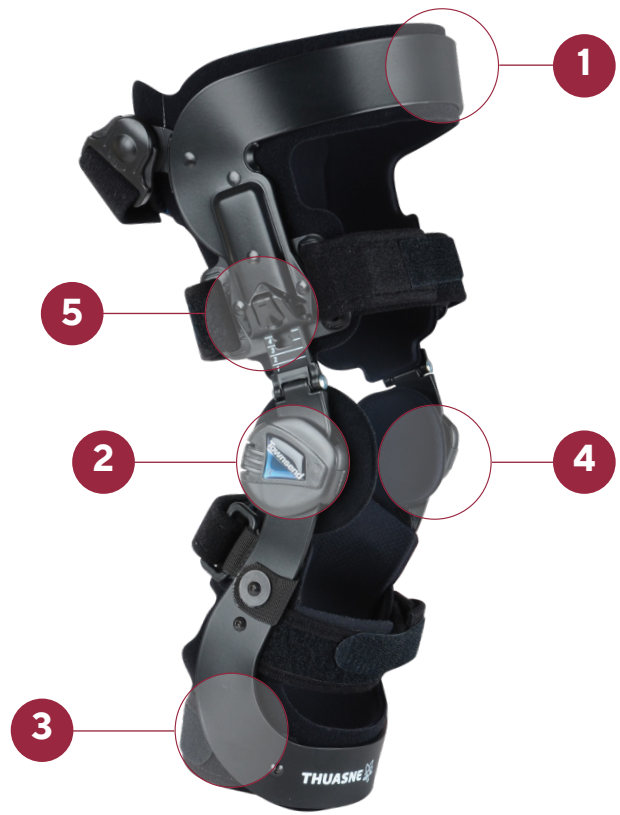

Open zone at the back of the knee

Hold: suspension strap above the calf and specially shaped tibial shell to prevent rotation

Comfort: inner foam lining

Practical: fitting buckle and tool-less adjustment of offloading level (Snap lock system)

2 models: right and left

Lock

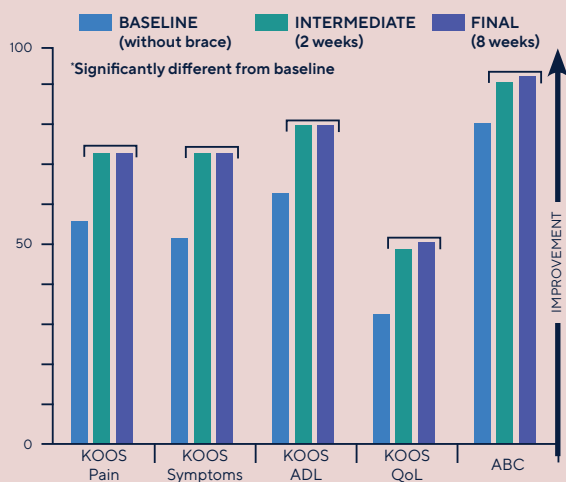

Adjustable Correction for OA Braces: LoadShifter

The patented LoadShifter mechanism and tool-less SnapLock are innovative features incorporated into the femoral section of Townsend's Rebel Reliever™, Premier Reliever and Reliever Air rigid OA knee braces. By releasing the SnapLock, the fitter can utilize the LoadShifter to adjust the angle of the thigh shell. Increasing corrective pressure at the top of the leg amplifies the three-point counterforce at the knee and distal end of the brace – improving leg alignment and reducing compressive load on the damaged side of the knee.

Clinically Proven to Reduce Pain & Improve Quality of Life

Studies show Rebel Reliever reduces pain and symptoms of OA, improves balance and muscle function, and provides immediate, positive impacts to quality of life for patients.

Stony Brook University Study

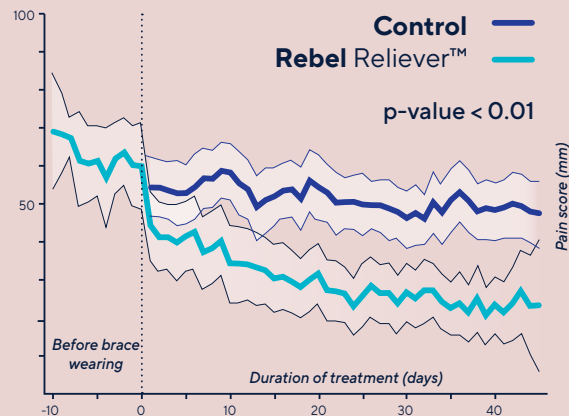

Studies demonstrate a reduction of pain and symptoms of OA, improved balance confidence and average daily living participation, and an overall improvement in quality of life.

ANKLE

FUNCTION OF ANKLE BRACES, ANKLE STIRRUPS AND WALKING BOOTS

PROPRIOCEPTIVE ANKLE BRACE

Improved proprioception (perception of the body in space) via the use of a compressive knit

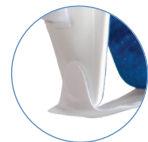

LIGAMENT ANKLE BRACE

Holds the ankle in an anatomical position using elastic straps

ANKLE STIRRUPS

Analgesic and protective action through a firmer immobilisation of the ankle. Its compressive effect can help reduce oedema

WALKING BOOT

Analgesic action through immobilisation of the ankle, reduction of the oedema thanks to adjustable compression, also suitable for managing post-operative treatment

Did you know?

6,000

people consult a health professional every day for an ankle sprain, i.e. 250 per hour¹

Athletes and young people

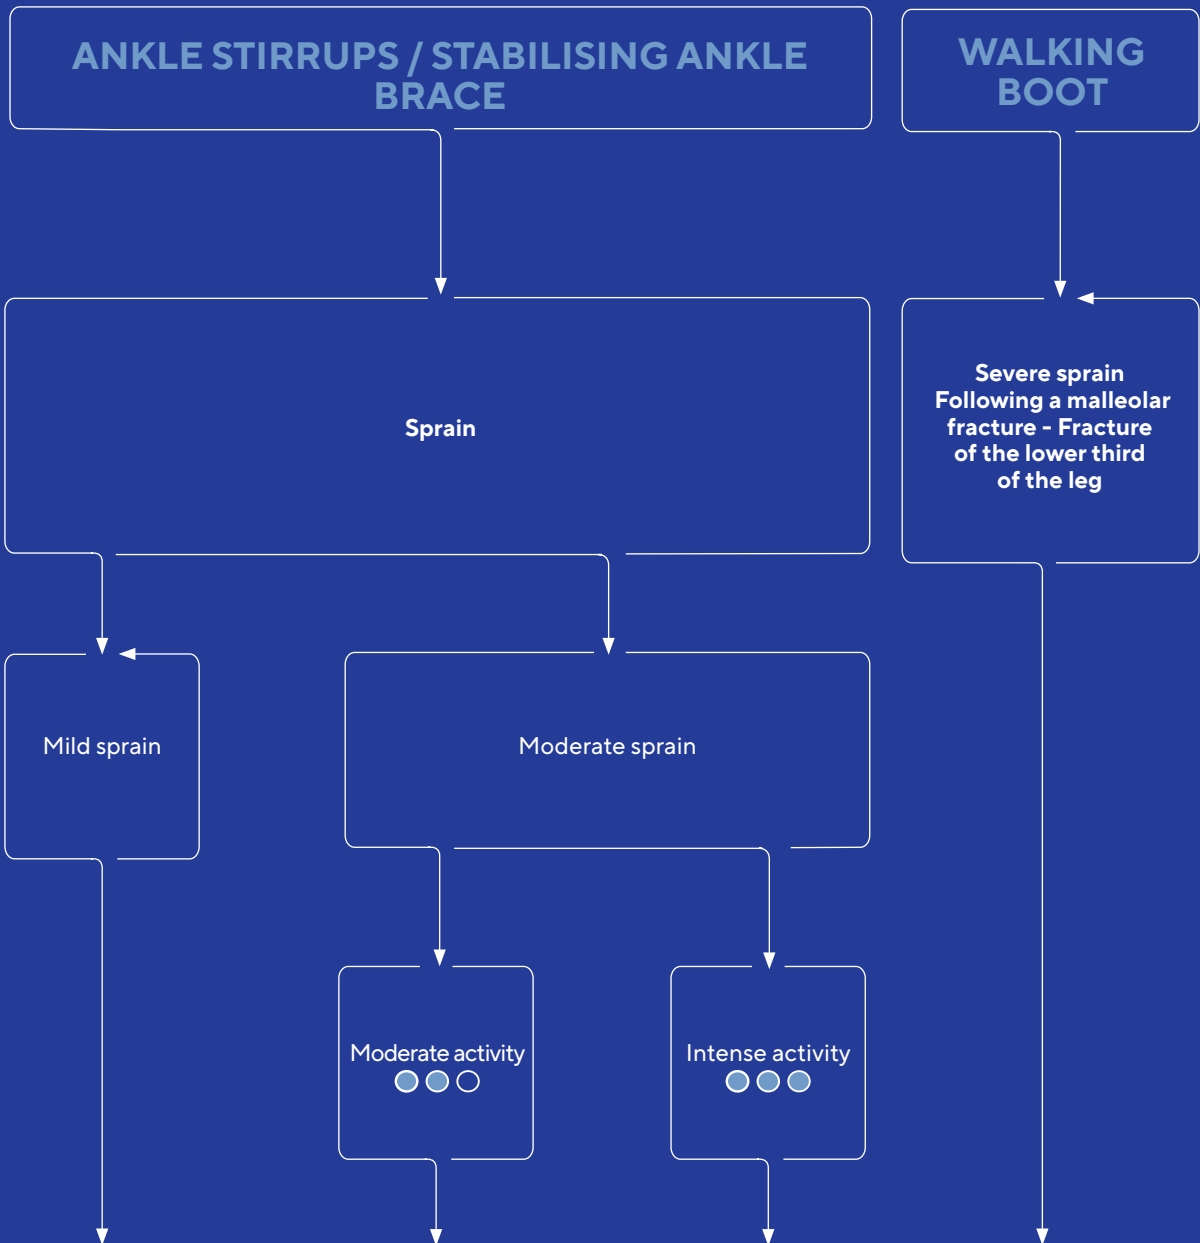

who are still growing are the most affected¹

PROPRIOCEPTIVE ANKLE BRACES

MalleoSoft

Proprioceptive elastic ankle support (about 17 mmHg)

3600 02

Indicated for

Joint instability/laxity.
Mild ankle sprain (acute phase).
Post-operative, post-traumatic residual pain and/or oedema.
Proprioceptive support for rehabilitation.
Sport activities resumption.
Compression for scar/burns healing.

Target patient

Patient with limited activity

POINTS TO REMEMBER

Proprioception: elastic compressive knit (about 17 mmHg)

Comfort: anatomical knitting with comfort areas on the malleolus

1	19 - 21 cm
2	21 - 23 cm
3	23 - 25 cm
4	25 - 27 cm
5	27 - 30 cm

Colour: Sliver 

MalleoAction

Proprioceptive elastic ankle support (about 22.5 mmHg)

2361 03

Indicated for

Joint instability/laxity.
Mild ankle sprain (acute phase).
Post-operative, post-traumatic residual pain and/or oedema.
Proprioceptive support for rehabilitation.
Sport activities resumption.
Compression for scar/burns healing.

Target patient

Patient with moderate activity

POINTS TO REMEMBER

Proprioception: elastic compressive knit (about 22.5 mmHg)

Comfort: anatomical knitting with comfort areas on the malleolus

Practical: pull tabs for ease of application

0	16 - 19 cm	New
1	19 - 21 cm	
2	21 - 23 cm	
3	23 - 25 cm	
4	25 - 27 cm	
5	27 - 30 cm	

Colour: Grey 

Silistab® Malleo

Proprioceptive anatomic protective ankle brace (about 21 mmHg) for the malleoli

2365 01

Indicated for

Joint instability/laxity.
Mild ankle sprain (acute phase).
Post-operative, post-traumatic residual pain and/or oedema.
Proprioceptive support for rehabilitation.
Sport activities resumption.
Compression for scar/burns healing.

Target patient

Patient with moderate activity

POINTS TO REMEMBER

Proprioception: elastic compressive knit (about 21 mmHg)

Comfort: anatomical knitting

Specific protection: silicone inserts protect the malleoli and instep

1	19 - 20 cm
2	21 - 22 cm
3	23 - 24 cm
4	25 - 27 cm
5	28 - 30 cm
6	31 - 33 cm

Colour: Black 

Silistab® Achillo

Proprioceptive achilles tendon ankle support (about 23 mmHg)

2355 03

New design

Indicated for

Conservative treatment of Achilles tendon rupture.
Post-operative, post-traumatic pain and/or oedema of the Achilles tendon.
Prevention of sports injuries of the Achilles tendon.
Prevention/treatment of Achilles tendon conditions (tendonitis, tenosynovitis, bursitis, achillodynia, Haglund's disease).

POINTS TO REMEMBER

Offloading of the Achilles tendon: stackable silicone heel pieces permitting 3 offloading heights (5, 8 or 13 mm)

Tendon protection and relief: peri-Achilles insert

Comfort: comfort zone over the malleoli

Practical: pull tabs for ease of application

Proprioception: elastic compressive knit (approximately 23 mmHg)

1	19 - 21 cm
2	21 - 23 cm
3	23 - 25 cm
4	25 - 27 cm
5	27 - 30 cm

Colour: Grey

Ankle

Malleo Dynastab® BOA®

Stabilising ankle-immobilising brace with BOA® fit system

2351 02

Also available with lace-up fastening:

Malleo Dynastab®
Stabilising ankle brace
2350 03

Indicated for

Ankle immobilisation.
Conservative treatment of Achilles tendon injuries.
Joint laxity/chronic instability prevention during sport activities resumption.
Moderate to severe ankle sprain.
Sport activities resumption.
Tendinopathy treatment.

Target Patient

Patients practicing pivot sports (basketball, volleyball, handball...)

POINTS TO REMEMBER

- 1 - Increased ankle stabilisation:** lightweight metal reinforcements and strapping
- 2 - Easy fastening:** BOA® Fit System for even tightening that does not loosen over time
- 3 - Easy fitting:** wide opening to make it easier to put on and take off
- 4 - Comfort:** slim, anatomical design so that it can be worn in most types of shoes. Micro-ventilated 3D knit to wick away moisture

* SO version, Bilateral for the Malleo Dynastab® BOA®.
BOA® is a registered trademark of Boa Technology inc.

Ligastrap® Malleo

Proprioceptive ligament ankle brace
(about 27.5 mmHg) with functional strapping

2180 04

Indicated for

Joint instability/laxity.
Mild ankle sprain (acute phase).
Post-operative, post-traumatic residual pain and/or oedema.
Proprioceptive support for rehabilitation.
Sport activities resumption.
Compression for scar/burns healing.

Target Patient

Patients practicing linear sports

POINTS TO REMEMBER

Support: double stabilising strap for lateral ligaments and additional strap for light eversion

Proprioception: elastic compressive knit (about 27.5 mmHg)

Comfort: anti-slip on the calf

1	19 - 21 cm
2	21 - 23 cm
3	23 - 25 cm
4	25 - 27 cm
5	27 - 30 cm

XLR8

Rigid shell walking boot with inflatable inserts

U08903 (long) - U09003 (short)

Indicated for

Ankle/foot post-operative/post-traumatic immobilisation.
Severe ankle/foot sprain.
Stable fracture of the lower third of the leg (tall version).
Conservative treatment of ankle/foot fracture.
Ankle/foot severe tendinopathy.
Conservative treatment of Achilles tendon rupture.

POINTS TO REMEMBER

Strict immobilisation: integral rigid shell

Adjustable: air cells integrated into the boot to adjust the pressure according to the oedema and for an optimal anatomical adaptability

Comfort: curved anti-slip sole for a natural and comfortable walk and protection of the toes thanks to the adjustable arch (3 positions)

Bilateral model.

Ligastrap® Immo

Stabilising ankle stirrup with support strapping

2337 02

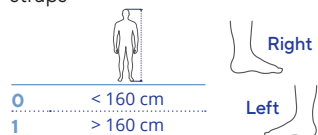

Indicated for

Ankle immobilisation.
 Conservative treatment of Achilles tendon injuries.
 Moderate to severe ankle sprain.
 Post-operative, post-traumatic residual pain and/or oedema.
 Sport activities resumption.

POINTS TO REMEMBER

Support: rigid lateral shells with asymmetrical hollows for the malleoli and additional reinforcement thanks to the removable strap

Easy to fit: closure with pulley system and self-fastening straps

Colour: Black ●

Ligacast® Air +

Ankle stirrup with inflatable pads

2334 01

Indicated for

Ankle immobilisation.
 Conservative treatment of Achilles tendon injuries.
 Moderate to severe ankle sprain.

POINTS TO REMEMBER

Immobilisation: lateral rigid shells

Comfort: inflatable inserts with inflator bulb (included) for morphological adaptation after fitting the splint

Easy to fit: self-fastening straps and adjustable calcaneal strap

SINGLE SIZE

Bilateral version

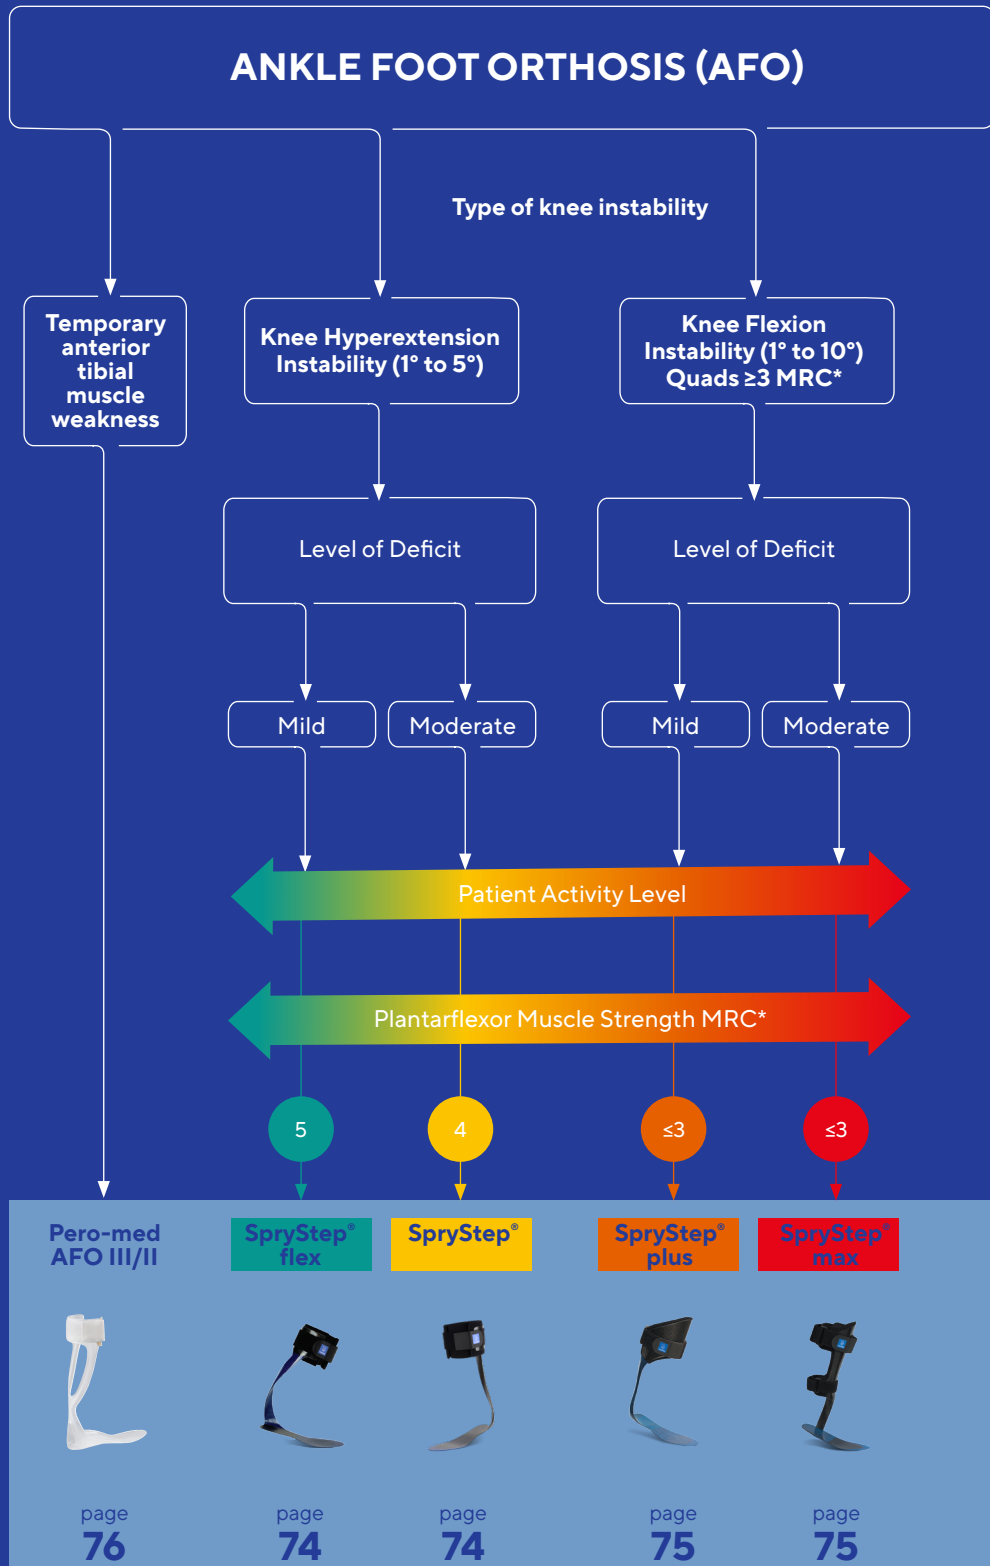

Colour: White/blue ●

* Make sure to follow as a priority the recommendations of a healthcare professional

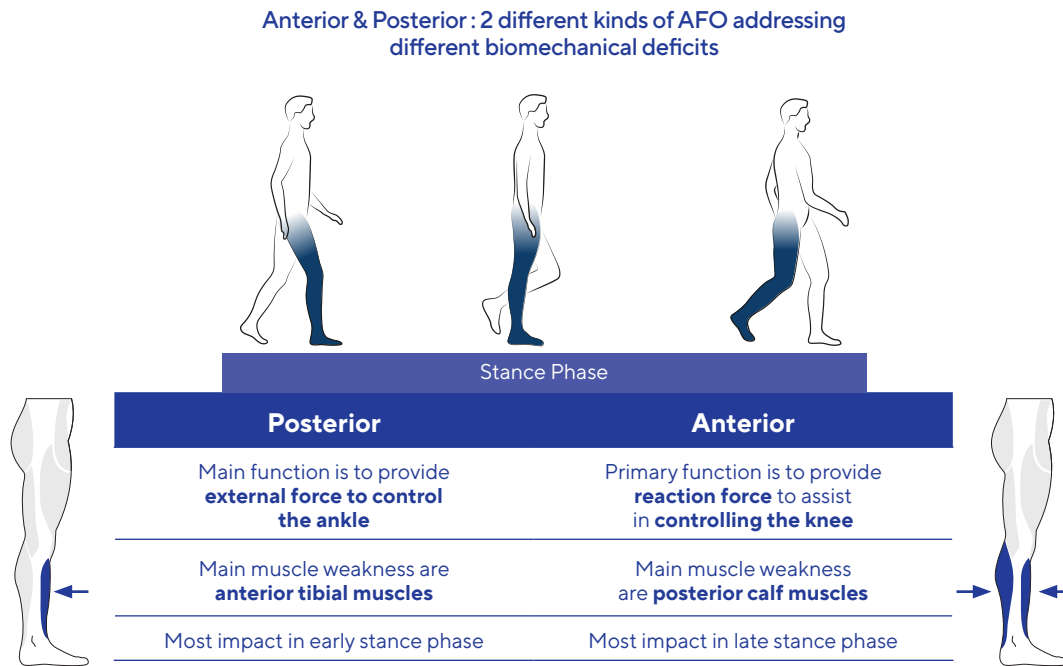

FOOT & ANKLE

Which solution
for **which condition?**

SpryStep® Range: DYNAMIC ANTERIOR AND POSTERIOR ANKLE-FOOT ORTHOSIS (AFO)

SpryStep® a complete range for patients suffering from lower limb weakness

Defined by elegance, Thuasne's SpryStep® range of AFOs is transforming the way people move. Using a proprietary blend of composite materials, the SpryStep® comes in a variety of solutions that are improving mobility and quality of life for patients.

**SpryStep Ortho-Neuro Solutions catalogue available –
To visit the online catalogue please scan the QR code below.**

SpryStep® Vector

Customizable in shape and stiffness the SpryStep® Vector offers superior control for the most complex conditions and patients.

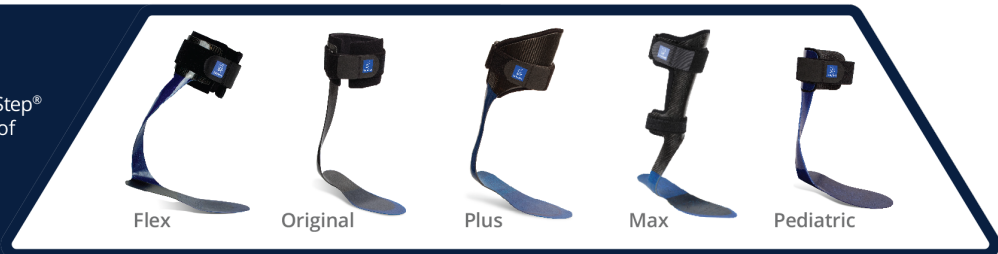

Custom SpryStep®

Custom shape, molded inner boots and pre-tib shell options take the SpryStep®, SpryStep® Flex and SpryStep® Plus to the next level.

SpryStep® OTS

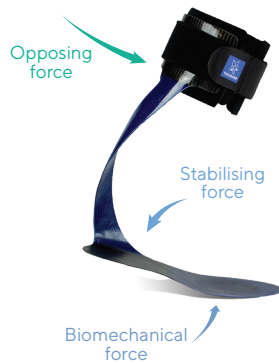

With Five different models, the SpryStep® OTS range addresses a wide array of indications with variations in strut placement, ground reaction force and stiffness.

SpryStep® flex

Posterior dynamic ankle-foot orthosis

U01712

Indicated for

Foot drop of neurological origin from central nervous system, peripheral nervous system or muscular origin without knee impairment

Target patient

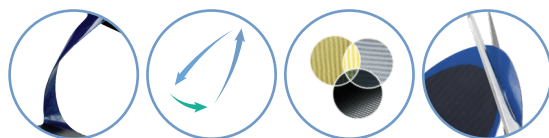

Patient with mild weakness of the lower limb (weakness of the anterior tibial muscle)
Patient with dynamic activities (fast walking, running, unstable surface...).

POINTS TO REMEMBER

Lightweight and durable composite structure designed with a unique combination of different materials blend and a precise manufacturing process.

The variety of materials used provides the patient with a good balance between flexibility and rigidity **to improve gait cycle and to offer greater energy return**

The 180° spiral strut provides great flexibility and allows an optimal energy return, ideal for people with intensive physical activity.

SpryStep® flex		
Shoe size		Height
XS	1 - 4	30 cm
S	3 - 6	32 cm
M	5 - 8	34 cm
L	7 - 9.5	36 cm
XL	9.5 - 12	38 cm

SpryStep®

Dynamic ankle-foot orthosis

U01703

Exists in paediatric version
SpryStep® paediatric
U01753
Available in October 2021
See page 84

Indicated for

Foot drop of neurological origin, traumatic origin or muscular origin.

Target patient

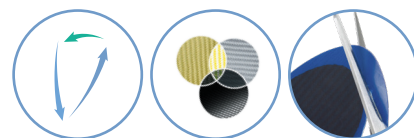

Patients with mild to moderate weakness of the lower limb (weakness of the anterior tibial muscle)
Patient with moderate activity (walking on a flat surface)

POINTS TO REMEMBER

Lightweight and durable composite structure designed with a unique combination of materials blend and a precise manufacturing process.

The variety of materials used provides the patient with a good balance between flexibility and rigidity **to improve gait cycle and to offer a rebound effect.**

Posterior lateral position of the strut **to optimise compliance and energy restitution during physical activity.**

SpryStep®

SpryStep® plus

Spiral anterior shell dynamic ankle-foot orthosis

U01722

Indicated for

Lower limb weakness of neurological, traumatic or muscular origin

Target patient

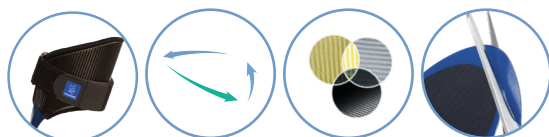

Patients with mild to moderate weakness of the lower limb (weakness of the anterior tibial muscle)

POINTS TO REMEMBER

Anterior carbon structure that supports and guides the knee towards extension, **helps the weakened plantar flexors to propel and support the knee during the extension phase.**

The variety of materials used allows the patient to have a good balance between flexibility and rigidity **to improve gait and allow the tibia to be tilted during the support phase.**

Posterior lateral position of the strut **to optimise compliance and energy restitution during physical activity.**

SpryStep® max

Anterior shell dynamic ankle-foot orthosis

U01732

Indicated for

Lower limb weakness of neurological, traumatic or muscular origin

Target patient

Patients with mild to moderate weakness of the lower limb (weakness of the anterior tibial muscle and gastrocnemius muscle)

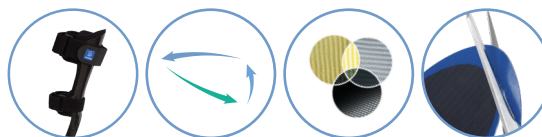

Lower activity level.

POINTS TO REMEMBER

Anterior carbon structure that supports and guides the knee towards extension, **helps the weakened plantar flexors to propel and maintain the knee during the support phase.**

The rigidity of the structure combined with the flexibility of the sole **provides great stability and energy return**

Lateral position of the upper, anterior to the malleolus, **to allow easy insertion into the shoe.**

Pero-med AFO III/II

Peroneal orthosis

T479652

Indicated for

Mild to medium foot lifting weakness, mild peroneal paresis of the IIIrd and IInd degree without spasticity

POINTS TO REMEMBER

Effective right-angle foot support to secure the walking motion

Extra comfort thanks to its **anatomical** shape and **light weight**

Its design allows it to be worn with all types of flat shoes

Colour: Black ●

Podo-med T500471

Forefoot offloading shoe with long sole and forefoot support strap

Indicated for
Post-operative use
Plantar ulcers
Injuries and fractures

POINTS TO REMEMBER

Offload: wedge shaped base with dorsal flexion at 10°
Foot protection and support: extended sole and end of foot fitting with self-fastening strap
Comfort: rounded heel for safe and comfortable walking. Seamless interior to avoid pressure areas

	Shoe size	Length

Pedipro

Shock-absorbing insoles and heel inserts

6510 01 (insoles) / 6500 01 (heel inserts)

Indicated for

Heel and foot pain, including metatarsalgia and plantar fasciitis. Rheumatoid foot. Relief for tendons.

POINTS TO REMEMBER

Distribution and absorption of vibrations: flexible silicone

Comfort and breathability: ventilation channels

Reinforced hold: non-slip pads

Under-heel thickness: 8 mm

Sold in pairs

	INSOLES	HEEL INSERTS
1	3 - 6	3 - 6
2	6.5 - 7	6.5 - 11
3	8 - 9	
4	9.5 - 11

Pedipro plus

Shock-absorbing insoles and heel inserts with cotton coating

6610 01 (insoles) / 6600 01 (heel inserts)

Indicated for

Heel and foot pain, including metatarsalgia and plantar fasciitis. Rheumatoid foot

POINTS TO REMEMBER

Distribution and absorption of vibrations: flexible silicone

Comfort: anatomically shaped inserts at the heel and metatarsals (insole) or at the heel spur (heel piece)

Reinforced hold in the shoe: non-slip pads

Under-heel thickness: 8 mm

Sold in pairs

	INSOLES	HEEL INSERTS
1	4 - 6	3 - 6
2	6.5 - 7	6.5 - 11
3	8 - 9	
4	9.5 - 11	

Colour: Whrite

Pedipro softer

Adaptable shock-absorbing heelpieces

6605 01

Indicated for

Heel and foot pain, including metatarsalgia and plantar fasciitis. Rheumatoid foot. Relief for tendons.

POINTS TO REMEMBER

Flexible silicone providing **shock absorption and distribution**

Progressive heel inserts with concave areas for suitable inserts: aniseed green insert for heel spur comfort, blue insert for healthy feet or other conditions

Comfortable thanks to **ventilation channels for better air flow**

High sides for better fit inside shoe

Under-heel thickness: 10 mm

Sold in pairs

1	3 - 6
2	6.5 - 11

Colour: Translucid

Elastocalx N

T479801

Indicated for

Osteoarthritis of the ankle, knee and hip joints. Degenerative diseases of the spine. Achilles tendon irritation. Muscle and tendon disorders. Overuse syndrome. Differences in leg length. Tilted pelvis irritation.

POINTS TO REMEMBER

Symmetrical, flat ended without sides

Easily fits into most types of shoes

Composition: silicone

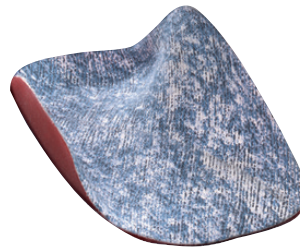

Single right/ left model

		Shoe size	Length
0	XS	13 - 2	20,3 - 21,7 cm
1	S	2 - 4	22,3 - 23,7 cm

Ortel C1 junior

Light cervical collar

2620 001 004

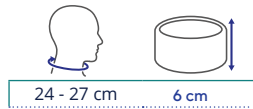

Indicated for

Torticollis, mild whiplash / mild sprain, cervical osteoarthritis, dropped head syndrome, post-operative use, cervical syndrome, rehabilitation after wearing a rigid cervical collar.

POINTS TO REMEMBER

Modular support: high quality foam with removable rigid reinforcement

Support: precise adjustment with self-fastening closure

Colour: Blue ●

Ligaflex® junior

Clavicular immobilisation straps

2640 02

Indicated for

Displaced or non-displaced clavicle fractures.

POINTS TO REMEMBER

Adaptability: trimmable straps to fit all patients (one size fits all)

Easy to fit: self-fastening system and buckle closure

Comfort: dorsal foam anchoring pad and quilted straps

Universal size (shoulder width < 34 cm)

Unique size

Colour: Blue ●

Ligaflex® Classic

Wrist immobilisation splint

2435 02

Indicated for

Wrist sprain.
Non-surgical wrist fracture.
Post-operative or post-traumatic wrist immobilisation.
Wrist tendinopathies.
Conservative treatment of carpal tunnel syndrome.
Lateral epicondylitis.
Rheumatoid arthritis.
Wrist osteoarthritis.

POINTS TO REMEMBER

Immobilisation: via a rigid, malleable and anatomical palmar stay

Comfort: aerated, foam lined fabric

Even compression: via dual strap system

Colour: Black ●

Ligaflex® Manu

Wrist and thumb immobilisation splint

2430 02

Indicated for

Thumb sprain.
Wrist and/or thumb sprain.
Non-surgical scaphoid fracture.
Non-surgical wrist fracture.
Post-operative or post-traumatic wrist/thumb immobilisation.
Wrist and/or thumb tendinopathies.
De Quervain tenosynovitis.
Rheumatoid arthritis.
Lateral epicondylitis.
Conservative treatment of carpal tunnel syndrome.
Thumb/wrist osteoarthritis.
Neuro-muscular impairments (contracture, hand drop or spasticity...).

POINTS TO REMEMBER

Wrist immobilisation: via a rigid, malleable and anatomical palmar stay

Thumb immobilisation: via a rigid, malleable thumb stay

Comfort: aerated, foam lined fabric

Even compression: via dual strap system

Colour: Black ●

KNEE

GenuAction

Proprioceptive elastic knee support

2325 03

Indicated for

Knee pain and/or swelling management
Joint instability/laxity
Proprioceptive support for rehabilitation
Conservative treatment of mild knee ligament injuries.

POINTS TO REMEMBER

Anatomically-shaped knit

Comfort zones over the patella and at the back of the knee

Class 3 compression level (French standard: 20-36mmHg /27,1-48 hPa) ensures good support and proprioception

0 28 - 31 cm

Colour: Dark blue/Grey

Ligaflex Immo 0°

Knee immobilisation splint at 0°

2410 04

Indicated for

Post-operative immobilisation.
Post-traumatic immobilisation.
Knee pain management.

POINTS TO REMEMBER

Knee joint stabilisation via rigid stays

Total immobilisation at 0°

Adjustable closure and support via self-fastening straps

0 30 - 45 cm

Colour: Navy

* New size

ANKLE

MalleoAction

Proprioceptive elastic ankle support

2361 03

Indicated for

Joint instability/laxity.
Mild ankle sprain (acute phase).
Post-operative, post-traumatic residual pain and/or oedema.
Proprioceptive support for rehabilitation.
Sport activities resumption.
Compression for scar/burns healing.

POINTS TO REMEMBER

Proprioception: elastic compressive knit (about 22.5 mmHg)

Comfort: anatomical knitting with comfort zone over the malleoli

Practical: pull tabs for ease of application

0 16 - 19 cm

Colour: Dark blue/Grey

* New size

Malleo Dynastab® BOA®

Stabilising ankle-immobilising brace with BOA® Fit System

2351 02

Indicated for

Ankle Immobilisation.
Conservative treatment of Achilles tendon injuries.
Joint laxity/chronic instability prevention during sport activities resumption.
Moderate to severe ankle sprain.
Sport activities resumption.
Tendinopathy treatment.

Target patient

Patients practicing pivot sports (basketball, volleyball, handball...)

POINTS TO REMEMBER

Ankle stabilisation: lightweight, lateral reinforcements and strapping for stability and immobilisation

Easy fastening: BOA® Fit System for a custom fit and even compression

Easy fitting: wide opening for ease of application and removal

Comfort: slim, anatomical design, fits easily in most types of shoes

Colour: Grey ●

Ligacast® junior

Stabilising ankle brace with foam inserts

2600 001 004

Indicated for

Ankle Immobilisation.
Conservative treatment of Achilles tendon injuries.
Moderate to severe ankle sprain.

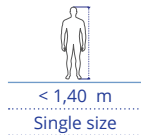

POINTS TO REMEMBER

Immobilisation of the ankle: lateral rigid shells

Comfort: padded foam inserts

Easy to fit: adjustment by self-fastening straps

Adaptability: height-adjustable calcaneal strap for adaptation to the patient's morphology

Colour: White ○

LigaStep Pedi Walker

Paediatric walking boot with rigid side uprights

U09201

Indicated for

Post-operative or post-traumatic immobilisation of the ankle or foot.
Severe ankle and/or foot sprains.
Stable fractures of the lower third of the leg.
Conservative treatment of ankle and/or foot fractures.

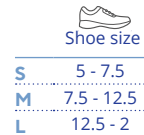

POINTS TO REMEMBER

Extra sturdy design for active kids

Rigid uprights provide protection and immobilisation of the injured limb

Lightweight structure reduces impact on gait pattern

Wide and anti-slip sole increases stability

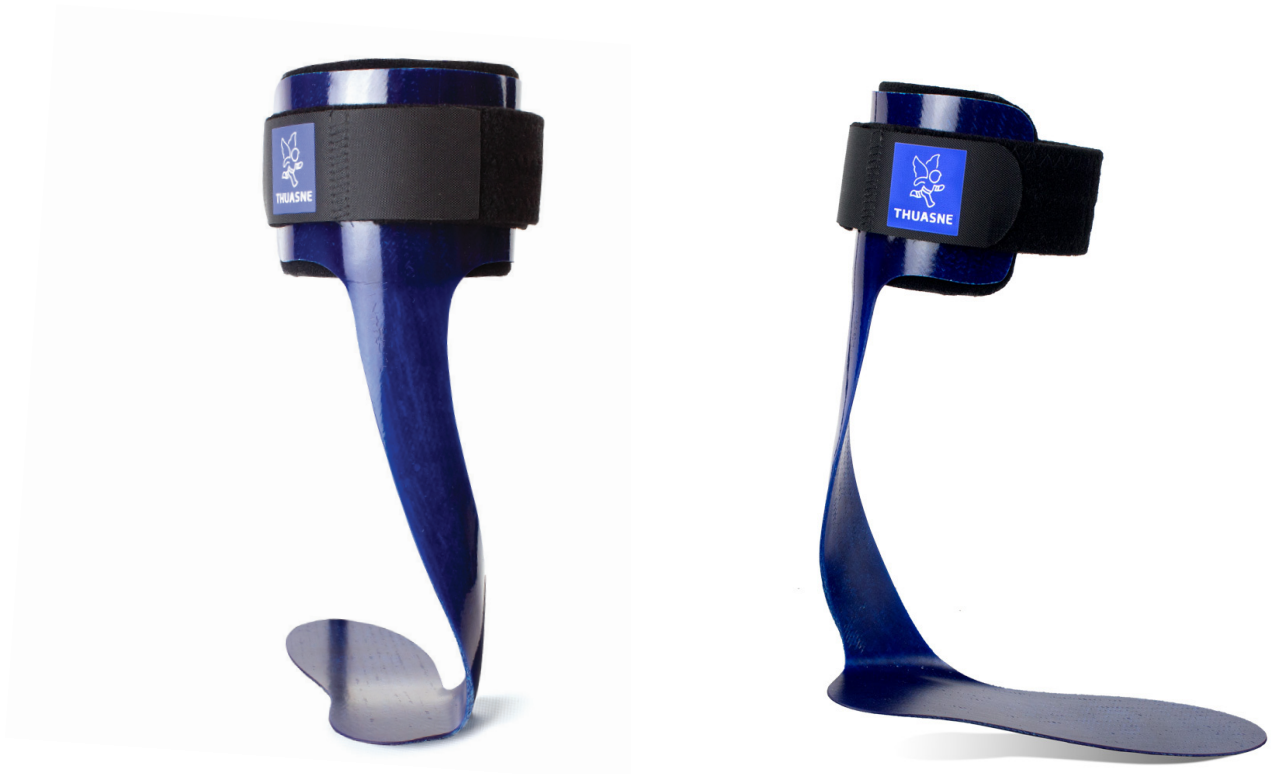

Colour: Grey ●

ANKLE

PAEDIATRIC AFO SPRYSTEP SOLUTIONS

POINTS TO REMEMBER

Prefabricated from size chart

Custom option available = Custom Sprystep Original

Broadly trimmable with scissors at the toe, medial side of footplate and calf cuff

Built with **medium flexibility** for dynamic children

Lightweight, durable composite construction

Lateral strut sweeping upwards to posterior

Fits easily into most styles of shoe.

 Shoe size	 Foot length		 Calf height

Lumbar support belt

0361 01

1

Indications: Non-specific low back pain (acute, subacute and chronic phases). Spinal stenosis

Properties: ventilated elastic fabric

S	M	L	XL	XXL
60-70	71-86	87-102	103-121	122-140

Neoprene shoulder padding

0576 03

2

Indications: Conservative treatment for non-surgical proximal humeral fractures Post-operative immobilisation (such as after rotator cuff surgery or dislocation reduction...) Shoulder and/or elbow injuries or inflammatory conditions Shoulder dislocation Shoulder subluxation or dislocation prevention (joint instability) Support for paralytic upper limb

Thermal insulation: neoprene

Anatomical fit: elastic knit coating

S	M	L
28-31	32-35	36-40

Anti-epicondylitis elbow brace

0336 03

3

Indications: Treatment of lateral or medial epicondylitis (tennis/golfer's elbow). Prevention of elbow tendinopathy recurrence. Support for physical activity resumption.

Modular product: prevention and acute pain

Evaporation of perspiration: perforated neoprene

Anatomical fit: anatomically shaped cut-outs

S	M	L	XL
22-24	25-27	28-30	31-33

Elbow support

0338 01

3

Indications: Treatment of lateral or medial epicondylitis (tennis/golfer's elbow). Tendinopathy treatment. Prevention of recurrence. Helps prevent pain during excessive effort (sport or work activities).

Compressive knit: improved proprioception

Comfort zone: easy centring of the elbow

Enhanced stretch: provides greater comfort, avoids excessive thickness

S	M	L	XL
22-24	25-27	28-30	31-33

Tennis elbow armband

0352 02

3

Indications: prevention of tendinitis of the elbow lateral epicondylitis (tennis elbow) or medial epicondylitis (golfer's elbow)

Properties: two silicone inserts provide localised compression and reduce tension on the elbow

1	2
22-30	30-38

Strapping thumb brace

0332 01

4

Indications: Immobilisation in case of pain or trauma of the thumb. Post-operative immobilisation. Thumb osteoarthritis (including rhizarthrosis).

Fragile thumb ligaments Wrist/thumb support: elastic straps

Evacuation of perspiration: perforated neoprene

Anatomical fit: anatomical shapes

S	M	L

SHAPE CAPTURE TECHNIQUE

Plaster/Fibreglass cast Direct Scan

OBJECTIVES

ACL PCL LCL MCL Meniscus Damage: Medial Lateral

SPRYSTEP KO

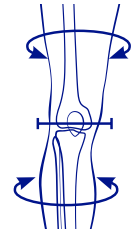

DEFAULT SPECIFICATION

- Custom to cast or digital scan
- Anterior shell configuration
- Anatomical contouring
- TF1 aluminium knee component
- Range adjustable bumper stoppers
- Replaceable strapping package
- Condyle pads
- Breathable liner
- 360mm height (180mm tibial and thigh)

_____ Circumference 6 inches
above mid-patella

_____ Medial-Lateral Knee Width (not
circumference) at knee center

_____ Circumference 6 inches
below mid-patella

Knee contracture or ROM limitation (Full ROM is assumed): _____

STRAP OPTIONS

**Force changes to default style*

SHELL CONFIGURATION

Tibial: Posterior Tibia Chevron Tibia Full Shell In-Fill 25mm Extension 50mm Extension

Thigh: Posterior Thigh Full Shell In-Fill 25mm Extension 50mm Extension

STIFFNESS

Decrease structural rigidity

Increase structural rigidity

STRAPPING OPTION

CS Package

PC Strap

Include spare set

Sizing

If your patient has proportional leg sizing (see sizing reference, below) or if you are ordering a brace for stock inventory please select from the size options.

X-Small Small Medium Large X-Large

Size	6" Above	M-L Knee	6" Below
XS	NA	3 - 3.5"	11 - 12.5"
SM	15.5 - 18.5"	3.5 - 4"	12.25 - 13.25"
MD	18.5 - 21"	4 - 4.5"	13.25 - 15"
LG	21 - 23.5"	4.5 - 5"	14.25 - 15.75"
XL	23.5 - 25"	5 - 5.5"	15 - 17"
XXL	25 - 28"	5.5 - 6"	17 - 19"
XXXL*	28 - 31"	6 - 6.5"	19 - 21"

*XXXL available on Rebel Pro only

Measurement Data

Required for "custom-fitted" Assembly*

Custom-fitted (Fabricated from three leg measurements)*

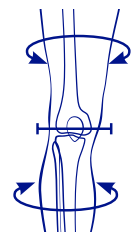

If your patient has a disproportionate leg, Thuasne USA will customize the assembly of your patient's brace. Please provide leg measurements beside the illustration, below.

More than one size difference between thigh and calf may require a full custom knee brace - please refer to the SpryStep Knee Brace

_____ Circumference 6 inches above mid-patella

_____ Medial-Lateral Knee Width (not circumference) at knee center

_____ Circumference 6 inches below mid-patella
